County Route 3 Corridor Improvements from Devon Drive to Kensington Drive

DB#: N2303

UPC#: 233020

County Route 3 is a two-lane roadway classified as an urban minor arterial per NJDOT Straight Line Diagrams, with an ADT of approximately 17,000 vehicles. The posted speed limit within the study area is 40 MPH. For most of its length, C.R. 3 contains one lane in each direction with minimal or no shoulders. total of 55 crashes with 18 injuries and 1 fatality were reported in total. Twenty-one (21) crashes occurred in 2017, sixteen (16) in 2018 and eighteen (18) in 2019. A large percentage of these crashes were of the rear end type, indicative of the extreme congestion throughout the corridor. A contributing factor to the crashes is the limited roadway width along a significant portion of the subject roadway. There are four County bridge structures within the study limits. They are County structure numbers MN-69, MN-55, MN-56, and MN-72.

FY 2024-2025 STUDY AND DEVELOPMENT PROGRAM

CR 614 (Tom Brown Road), CR 603 (Riverton Road) and New Albany Road Intersection Improvement	DB#: D2201 UPC#: 223000
---	------------------------------------

The study will be conducted as part of DVRPC’s Local Concept Development Program in order to explore ways to improve safety and efficiency of three intersections of CR 614 (Tom Brown Road), CR 603 (Riverton Road) and New Albany Road, in Moorestown Township that form a three-intersection triangle. Two intersections have a skewed alignment and substandard sight distance. The intersection of CR 614 (Tom Brown Road) and New Albany Road is a 4-way stop and has previously been identified by DVRPC as a high crash location in the Highway Safety Improvement Program (HSIP) eligibility rankings (2018). The LCD study shall focus on developing a concept for improving the safety and efficiency of the three intersections for motorists, bicyclists and pedestrians. The concept/location of modern roundabout(s) shall be included in the study.

Easton Avenue (CR 527) Safety Improvements	DB#: N2306 UPC#: 233050
---	------------------------------------

Easton Avenue consists of two travel lanes in each direction with 2-foot shoulders through most of the project area; there are no shoulders north of Cedar Grove Lane. Some sections of Easton Avenue through Franklin Township have a concrete central median to restrict turning maneuvers into and out of the travel lanes from side streets and driveways, but the two project sections in this project are undivided. Easton Avenue has a posted speed limit of 40 to 45 miles per hour (mph) and an AADT of more than 41,000 vehicles. The 2019 NJTPA Network Screening list for Roadway Corridors ranks this roadway at number 1 within Somerset County and number 3 Statewide with 270 total crashes from 2014 through 2016. The proposed project will look at improvements to facilities to improve safety conditions and pedestrian circulation these two sections.

FY 2024-2025 STUDY AND DEVELOPMENT PROGRAM

Floodgate Road, Bridge over Repaupo Creek (Bridge 3-D-1)	<i>DB#: D2214</i> <i>UPC#: 223470</i>
---	--

This Local Concept Development study from the DVRPC FY2023 UPWP aims to identify and select a preliminary preferred alternative that will improve the Floodgate Road Bridge over Repaupo Creek and remove any substantial deficiencies including any functional obsolete rating. The bridge is the only means of access to the Delaware River levee system, floodgates and storm water pumping station which protect the Gibbstown section of Greenwich Township. The current weight restriction on the bridge limits the ability to utilize heavy machinery and delivery of materials to this vital protection system for a large portion of Greenwich Township and is needed for emergency management measures. Additionally, there is a park and a small community on the one side of the bridge without alternative access that relies on the bridge. The small community of under a dozen homes has no sewer service and requires septic pumping on a regular basis; however, the current weight restriction limits the ability to utilize standard septic disposal trucks, as well as standard heating oil delivery trucks to service this community. The bridge sufficiency rating is 40.6.

Kennedy Boulevard (C.R. 6) & County Line Road (C.R. 526) Congestion Mitigation

DB#: N2305
UPC#: 233040

The parallel corridors of Kennedy Boulevard (C.R. 6) and County Line Road (C.R. 526) experience very heavy congestion, particularly during the AM and PM peak hours, due to a densely-spaced mixture of commercial and residential uses in the project area. With an ADT of approximately 18,000 vehicles. State Route 9 bisects the project area. In addition to the high volume of vehicular traffic along these corridors, the residents of Lakewood fully utilize alternative means of transportation, such as walking and bicycling. The heavy volumes of vehicular, pedestrian and bicycle traffic create unsafe conditions along these corridors. Modifications are needed to improve traffic flow and safety for all road users. East and West County Line Road and Kennedy Boulevard were identified as corridors in need of additional improvements to accommodate future traffic volumes identified in the 2017 update to the County's Transportation Model.

Lenape Island Road Bridge over Indian Lake

DB#: N2307

UPC#: 233060

The existing Lenape Island Bridge (Lenape Trail) (Morris County No. 1400-935) over Indian River is an eight-span structure consisting of continuous rolled steel multi-girders with a corrugated steel deck. Lenape Island Road Bridge is the only form of access on and off the island. The bridge was originally built 1966. The poor superstructure rating is due to advanced corrosion, section loss, holes to several girders. This poor condition of the superstructure has also caused the bridge to be classified as Structurally Deficient and currently has a Sufficiency Rating is 37.7.

Parkers Creek Bridge on Centerton Road

DB#: D2212

UPC#: 223150

A concept development study will be conducted as part of DVRPC's Local Concept Development Program for this project. Primary tasks will include data collection, purpose and need statement, development of alternatives including project costs, community outreach, selection of PPA, and NEPA classification. The Burlington County Bridge No. C4.13 Parkers Creek Bridge on Centerton Road bridge is a single span (38 feet), concrete arch widened with pre-stressed concrete voided slab beams. The Parkers Creek Bridge carries Centerton Road over the creek with 2 lanes of opposing traffic and approximately 3.5' shoulders on each side of the road. The bridge is individually historically eligible (source: NJDOT Historic Bridge Survey). Improvements are needed for this bridge due to the structure's age (over 100 years), structurally deficient status, scour critical status, and lack of original construction and foundation plans.

Tremley Point Connector Road	DB#: 9324A UPC#: 058050
-------------------------------------	--

The Tremley Point Connector Road is a new four-lane, predominantly pile-supported, approximately 1.1 mile long roadway/bridge that will cross the Rahway River, featuring two 12-foot lanes in each direction and 3-foot wide right shoulders. The redevelopment of the Tremley Point area of Linden has been the subject of numerous reports and analysis. The local roadway system in Linden is unable to support the increase in truck traffic anticipated by the redevelopment of the Tremley Point Brownfield into more than six million square feet of warehouse and distribution space. The Tremley Point area is located less than 10 miles from Port Elizabeth, Newark and Newark Liberty International Airport. The NJ Turnpike is currently advancing the Environmental Assessment document with the USCG for a Connector Road from Tremley Point in Linden to Industrial Highway in Carteret, which has access to NJ Turnpike Interchange 12.

FY 2024-2025 STUDY AND DEVELOPMENT PROGRAM

West County Drive Extension

DB#: N2102
UPC#: 213690

The project is an expansion of the the Old York Road (CR 637) Intersection Improvements project. The project includes the construction of West County Drive from Old York Road to US 202 to the west of the existing traffic patterns along US 202, Old York Road and Chubb Way. This bypass road would accommodate historical regional traffic, that normally creates the congestion at the Old York Road and US 202 signal. By constructing West County Drive, traffic would circumvent the Old York Road and US 202 signal and alleviate congestion in the region. The Project includes a new 48' wide 2800 ft. long roadway, a new traffic signal at the west terminus at Old York Road, and a reconstruction of the traffic signal at the west terminus at US 202. The Project is included in the County Master Plan and critical to support the community's infrastructure. It will also accommodate future commercial, industrial, retail, and residential development scheduled for the surrounding area all of which will increase traffic in the region.
