SECTION I

INTRODUCTION

FISCAL YEAR 2017

TRANSPORTATION CAPITAL PROGRAM

Introduction

The Transportation Capital Program for FY 2017 describes the planned capital investments for the fiscal year starting July 1, 2016. It represents the annual element of the New Jersey Department of Transportation's and NJ Transit's ten-year Statewide Transportation Improvement Program (STIP).

Focusing on the department's Core Mission—safety, infrastructure preservation, mass transit, mobility and congestion relief, and operations and maintenance—this Capital Program outlines projects and programs that rebuild the State's bridges and roads, provide mass transit services, and reduce congestion by deploying Intelligent Transportation Systems (ITS) technology.

This Capital Program reflects the need to prioritize spending in a difficult economic environment by carefully evaluating transportation needs and targeting limited resources toward safety, fix-it-first and state-of-good-repair initiatives.

Overview

The FY 2017 Transportation Capital Program totals \$3.910 billion and is funded primarily by the State Transportation Trust Fund (TTF), federal, and third-party resources. This includes a total of \$3.680 billion for both NJDOT and NJ Transit and \$230 million for Port Authority projects.

State Funds

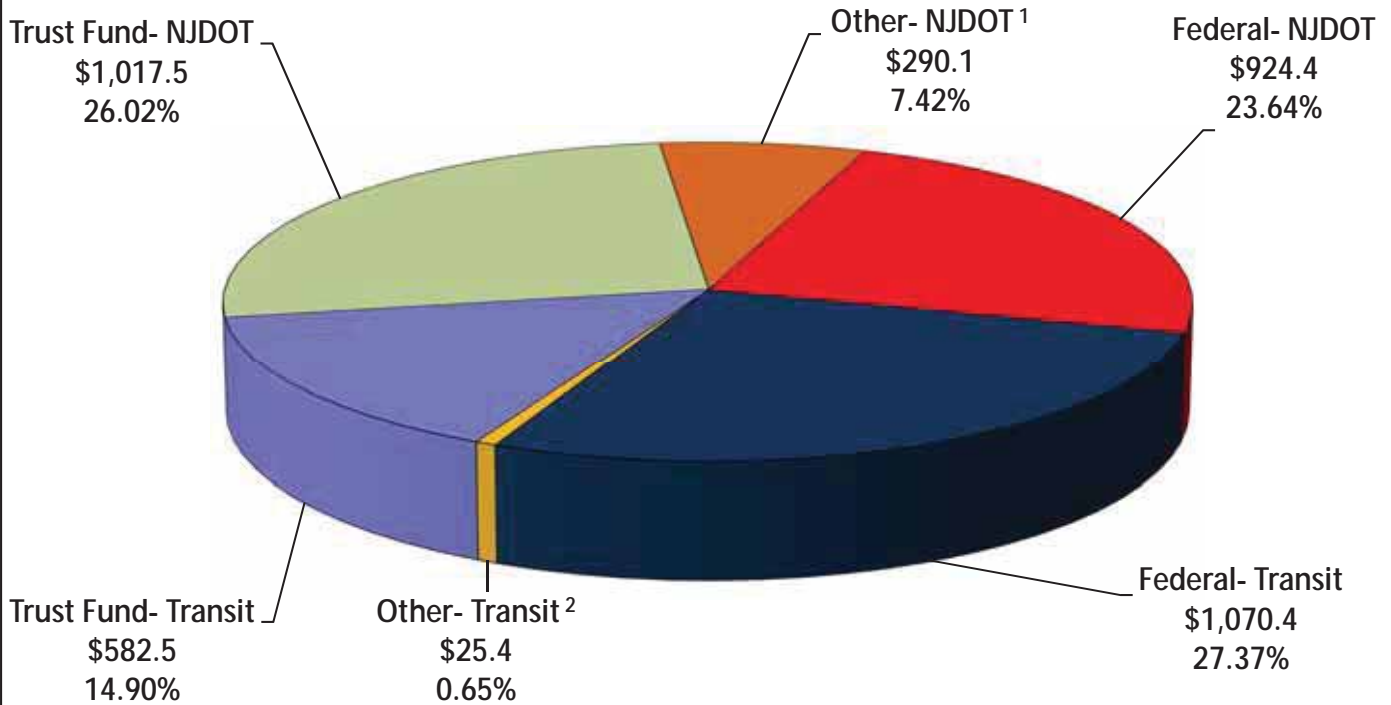

State funds are programmed at \$1.600 billion.

- \$1.0175 billion for NJDOT
- \$582.5 million TTF for NJ TRANSIT

Federal Funds

Federal revenues for FY 2017 are projected at \$1.9948 billion. NJDOT's share of the federal funding is \$924.4 million, while NJ Transit's allotment is \$1.0704 billion.

Sources of Funds (\$ in Millions)

1. \$230 M PANY&NJ's Route 440 Bayonne Bridge project; \$55.1 M Port Newark Container Terminal, Access Improvement and Expansion Project; \$5 M Route 1&9 Interchange (Union)
2. \$17.5 M Casino Revenue Fund; \$6.9M Operating Agreements.

NJDOT

NJDOT's \$2.232 billion Capital Program addresses New Jersey's transportation needs:

- The NJDOT program provides \$551 million for state and local bridges. Bridge investments range from funding for high-cost bridges to implementation of a variety of rehabilitation programs and local bridge rehabilitations.
- The NJDOT program provides \$417 million dedicated to road assets, including pavement rehabilitation, reconstruction and resurfacing.
- The NJDOT program provides \$102 million for safety improvements. Key programs funded include the Crash Reduction Program, Intersection Improvement Program,

Pedestrian Safety Initiatives, Rail-Highway Grade Crossings, and Safe Routes to School Program.

- The NJDOT program provides \$244 million in funds to address highway congestion through infrastructure improvements as well as efforts to better manage traffic and respond to incidents.
- The NJDOT program provides \$127 million for multimodal investments that support maritime, freight, and rail initiatives as well as bicycle and pedestrian improvements.

NJ Transit

NJ Transit's \$1.6783 billion capital program addresses New Jersey's mass transit needs:

- The program budget allots over \$1.662 billion to address NJ Transit's state-of-good-repair needs, debt service obligations, preventive maintenance and local programs. The program continues to provide funding to support for ongoing track replacement, bridge and tunnel inspections and improvements, security improvements, signal system upgrades, overhead power line and electric substation upgrades, replacement of buses in NJ Transit's fleet, and other rail station and bus terminal improvements throughout New Jersey.
- The program allocates \$16.3 million through the Federal Transit Administration's Public Transportation Emergency Relief Program for repair, recovery and resiliency projects associated with Superstorm Sandy.

Port Authority Bridges

The Capital Program includes PANYNJ funding of \$230 million to raise the Route 440 Bayonne Bridge. This project is shown in this Capital Program to remain consistent with federal budgeting directives.

Local System Support

Local System Support totals \$418 million. NJDOT is providing \$368 million in federal and state funded local system support, which includes the \$165 million State Aid Program for municipalities and counties as well as the \$25 million Local Bridge Initiatives Program. NJ Transit's local support totals \$50 million. Additionally, funds for programs such as Local Safety, High Risk Rural Roads, Safe Routes to School, and Culvert Inspection are programmed on the local system.

SECTION V

NJDOT PROJECT / PROGRAM DESCRIPTIONS

**FY 2017 TRANSPORTATION CAPITAL PROGRAM
New Jersey Department of Transportation Projects**

<i>Program/Project Name</i>	<i>Project ID Numbers: X12 / 800009</i>
Acquisition of Right of Way	

This program funds advanced acquisition and/or demolition of; key right of way parcels, easements, transportation facilities, and access and development rights, in order to preserve transportation corridors for future transportation use.

COUNTY: Various

MUNICIPALITY: Various

MILEPOSTS: N/A

STRUCTURE NO.: N/A

Statewide	ROW	STATE	179	\$500,000

<i>Program/Project Name</i>	<i>Project ID Numbers: 11344 / 113440</i>
ADA Curb Ramp Implementation	

This program was initiated from a Federal Highway Administration (FHWA) request of the NJDOT to complete an Americans with Disabilities Act (ADA) Curb Ramp Inventory, and to develop a Curb Ramp Implementation Program. A priority list of locations that are missing ADA curb ramps was developed, and funding provided by this program will be applied to projects that are missing ADA curb ramps statewide.

**FY 2017 TRANSPORTATION CAPITAL PROGRAM
New Jersey Department of Transportation Projects**

<i>Program/Project Name</i>	<i>Project ID Numbers: 08415 / 084150</i>
Airport Improvement Program	

This program provides funding for grants awarded by the Commissioner of the NJDOT pursuant to a competitive application process for project types, including but not limited to, safety, preservation, rehabilitation, and capital improvements (such as runway, taxiway and apron improvements, airport lighting and navigational aids, aviation fuel farms, automated weather observation systems, airport security, and airport access roads). Such grants may be used at public-use general aviation airports for; aviation planning purposes, aviation education and promotion programs, aviation studies, airport feasibility studies, and/or to provide funds which will help match and capture federal funds. This program may also fund capital improvements to airports owned by the state.

New Jersey Department of Transportation Projects**

Program/Project Name

Project ID Numbers: 13303 / 133030

Automatic Traffic Management System (ATMS)

This program will provide funding for the deployment program for the first Automatic Traffic management System (ATMS) in the State including all phases of design. This program will include funding for the complete delivery of the Final Design document for Automatic Traffic Management System (ATMS) for a candidate highway (I-80, I-295 or I-78). The design document will be used to deploy and carry out the actual construction of this technology for automatic operation and handling of traffic.

New Jersey Department of Transportation Projects**

<i>Program/Project Name</i>	<i>Project ID Number: X185</i>
Bicycle & Pedestrian Facilities/Accommodations	

This is a comprehensive program to insure the broad implementation of the Statewide Bicycle and Pedestrian Master Plan, Complete Streets Policy and the implementation of federal and state policies and procedures pertaining to bicycle, pedestrian, transit and ADA access and safety. This program includes addressing bicycle, pedestrian, transit and ADA travel needs through the development of improvements on state, county and local system either by independent capital projects or through grants to counties and municipalities. Projects must make full consideration for the needs of all users.

<i>Program/Project Name</i>	<i>Project ID Number: 98315</i>
Bridge Emergency Repair	

This program allows the NJDOT to provide emergency bridge repairs through various Bridge Maintenance Contracts (i.e., Concrete Structural Repair, Structural Steel Repair, and Timber Structure Repair contracts). The program also allows the NJDOT to obtain emergency technical consultant assistance, for inspection and repair design, when the safety of a bridge(s) is compromised due to unavoidable circumstances (a collision, flood damage, etc.) These consultants will be available to assist NJDOT personnel on an as-needed basis.

Bridge Preventive Maintenance	

This program provides funding for bridge preservation activities (including painting, deck repairs, and substructure repairs) as a means of extending structure life. Painting contracts shall include painting of steel on various structures, as an anti-corrosion measure, and will be awarded based on an approved list of bridges considering the availability and regional breakdown of funding. Preventive maintenance contracts shall include deck repairs, header reconstruction, curb reconstruction, joint resealing, substructure concrete repairs, and sealing of entire structures, with structures systematically prioritized by corridor or geographical area. Both painting and preventive maintenance contracts are awarded to preserve and prolong the useful service life of bridges, in accordance with the NJDOT Bridge Preventive Maintenance Program.

Camp Meeting Avenue Bridge over Trenton Line, CR 602

Initiated by the Bridge Management System, this project will replace the "orphan" structure, which is in critical condition. The replacement of this structure will be designed so as not to preclude improvements needed to reintroduce passenger service to the West Trenton Line, as well as increasing the height of the bridge to allow the current tracks to be raised to address ongoing railroad operational issues, as identified in the NJTPA Grade Crossing Assessment Study. The current bridge provides a single lane of traffic, has steep grades on the approaches and has substandard vertical sight distance. The new bridge will be wider to accommodate two traffic lanes, and the grade and vertical sight distance will also be improved.

<i>Program/Project Name</i>	<i>Project ID Numbers: 02379 / 023790</i>
Congestion Relief, Intelligent Transportation System Improvements (Smart Move Program)	

This program provides funding for low-cost, quick-turnaround intelligent transportation system (ITS) improvements, which improve traffic flow and provide traveler information on the state's transportation system. This program will provide for the deployment of these systems through either separate ITS projects, or inclusion of ITS within existing roadway and bridge infrastructure preservation projects to ensure implementation of ITS at a minimum cost and a minimum disruption to traffic during construction. Design support to add ITS components and/or standards may be accomplished through using consultants. ITS equipment are long lead time items and this program will allow procurement to proceed in advance and then to be installed in the first stages to also assist in the mitigation of traffic impacts during construction of those projects. ITS equipment may include Dynamic Message Signs, which provide real time traffic information, in strategic locations to allow the motoring public to make informed decisions on possible alternatives.

Gloucester County Bus Purchase	

In the DVRPC region, a combination of fixed route, subscription, and demand responsive transit services are provided in Gloucester County by the Gloucester Division of Transportation Services (DTS). All are independent community transportation services meeting a variety of needs of their residents. Trip purposes served by these community transit providers include employment, non-emergency medical, nutrition, personal business, and shopping trips. This project provides funds for purchasing new capital equipment, usually lift-equipped vehicles.

Highway Safety Improvement Program Planning	

This item consists of two programs: Safety Management System (SMS) safety improvement projects and Rail-Highway safety improvement projects. SMS, through guidance of the HSIP (23 CFR 924), identifies, prioritizes and implements safety programs and projects associated with safe corridors and intersection improvement programs in an effort to reduce crashes and crash severity on New Jersey's roadways. Safe Corridor Program currently includes portions of Rt. 1, 9, 22, 40, 46, 47, 73 and 206. The Intersection Improvement Program includes right angle, left turn, same direction and pedestrian crash intersection locations. Rail-Highway Program will continue onsite inspection of public grade crossing to identify rail-highway grade crossing hazards to develop and implement rail-highway grade crossing safety improvements.

Intelligent Traffic Signal Systems	

This program will seek to improve mobility on New Jersey’s arterial highways. Arterials contribute almost 70% of total congestion that occurs in New Jersey. This program will focus on dynamically managing NJ’s arterials from NJDOT’s Arterial Management Center. Existing traffic signals will be strategically, systematically and programmatically upgraded from stand-alone signals to highly sophisticated, coordinated, real time traffic response traffic signals. This upgrade will consist of installing new controllers, intelligent software and algorithms, robust detection and communication. This is a plan to upgrade most of the signals on NJDOT owned highways only.

Local Safety/ High Risk Rural Roads Program	

The Local Safety Program provides funds to counties and municipalities for the improvement of dangerous intersections and other road improvements, focusing on pedestrian and vehicular safety improvements of critical need that can be delivered in a relatively short period of time, generally less than two years from problem identification to completion of construction. This program also includes design assistance offered to counties and municipalities for the LSP projects. Depending upon the previous year crash history, this program may encompass certain set aside funding per year for High Risk Rural Roads, for safety countermeasures on rural major or minor roads, or on rural local roads. NJDOT designates as Advance Construction all projects funded from this program.

Mobility and Systems Engineering Program

This combined program seeks to improve mobility inclusive of but not limited to Intelligent Transportation Systems (ITS), Traffic Signal Timing and Optimization, monitoring Workzone Mobility and Advanced Traveler Information System (ATIS) programs. A combined program will allow for improved, cohesive and sustainable planning, design, procurement and deployment of operations' strategies such as ITS technologies and ATIS. Federal mandates such as: (a) following and maintaining ITS Architecture, (b) preparing TMPs for major construction projects, (c) motorist's information sharing (511), (d) "Every Day Counts" initiatives, (e) incorporation of adaptive signal systems, (f) hard shoulder use, (g) performance measures and, (h) maintenance/upgrade/enhancement of existing ITS infrastructure and hardware are covered under this program. This program also includes review and development of new technology and the possible application, design, procurement, testing and deployment of such technologies. The development of contract documents and engineering plans for various projects and ITS contracts is also included. This program includes technical and engineering support needed for the Traffic Operations Centers; development, enhancement and maintenance of the existing ITS infrastructure, ATIS associated database; and funding for Multimodal Transportation Coordination and Information Related Services. This program will support NJDOT's traffic signal optimization efforts and the Arterial Management Center.

Pavement Preservation	

This program will allow NJDOT to accomplish eligible federal pavement preservation activities on New Jersey's Interstate highway system and will also allow for pavement preservation on all other state-maintained roads, which help to keep New Jersey's highway system in a state of good repair. With timely preservation, the NJDOT can provide the traveling public with improved safety and mobility, reduced congestion and smoother, longer lasting pavements.

<i>Program/Project Name</i>	<i>Project ID Number: X35A</i>
Rail-Highway Grade Crossing Program, State	

This program will provide state funding for the elimination of hazards at rail-highway grade crossings by the closure of crossings or the upgrade/improvement of protective warning devices for roads throughout the state. This funding will allow flexibility in allocating monies for emergency repairs as well as to the areas in need regardless of their geographic location (MPO). This program will also allow grade crossing closures without drawing down the federal funds used for grade crossing improvements. Funding will also be provided for the design of traffic detours required for the crossing surface reconstruction projects.

This program will also provide funding for emergency repairs to the riding surface of highway-rail grade crossings identified during inspections or from complaints received. These repairs will be accomplished by an NJDOT contractor as priority situations are identified. These repairs will be limited to surface repairs that do not require railroad infrastructure work, or reconstruction of the crossing. This program will also include the installation of roadway-related items (signs, pavement markings) that have been identified as missing or needing replacement or are required (outstanding work from municipalities and counties) to close out federally funded grade crossing projects from previous years.

South Inlet Transportation Improvement Project	

This project provides improvements to feeder roads in Atlantic City, as identified by the Casino Redevelopment Authority (CRDA). The improvements will maintain, operate and support Atlantic City Expressway Projects of the South Jersey Transportation Authority (SJTA). The project includes; Melrose Avenue between Delaware and Connecticut Avenues, Connecticut Avenue from Melrose to Oriental Avenues, Massachusetts Avenue, and various other intersection and capital improvements. The NJDOT has agreed to provide one-third of the eligible costs, up to \$17 M, plus the additional funds needed to finance bonds. Approximately \$1.5 M of Transportation Trust Fund (TTF) funding will be provided to the SJTA, by the NJDOT, annually for 20 years for this purpose (except for the first year which will be \$1.7 M of TTF funds). The SJTA will issue debt based on the NJDOT's funding guarantee, and provide the funding to CRDA. This project is multi-year funded.

<i>Program/Project Name</i>	<i>Project ID Numbers: D9912A / 123210</i>
South Pemberton Road, CR 530, Phase 2	

This project, a breakout of DBNUM D9912, will reconstruct, and provide lane and shoulder widening, on South Pemberton Road (CR 530) from Hanover Street (CR 616) in Pemberton Borough to Route 206 in Southampton Township. The widening of the roadway will include a 5 lane cross-section that contains a continuous dedicated turn lane, new six-foot shoulders, and four twelve-foot travel lanes. The roadway segment is a heavily traveled corridor due to the fact that it is a continuation of Route 38. Route 38 ends at Route 206 (The South Pemberton Road westernmost limit) and becomes South Pemberton Road (CR530). This project provides for the acquisition of easements and/or full takings of over 90 parcels, and provides for the environmental clean-up and demolishing of all structures. This project will also include tree clearing to accommodate the new roadway and shoulder width. This project is multi-year funded.

Statewide Traffic Operations and Support Program

This comprehensive Statewide Traffic Operations and support strategies program focuses on reducing non-recurring delays due to incidents, work zones, weather emergencies, poor signal timings, special events, etc. The program includes a Statewide Traffic Management Center (STMC), a Traffic Operations Center South (TOCS), a Safety Service Patrol (SSP), a NJDOT/NJSP Traffic Incident Management (TIM) Unit and a Central Dispatch Unit (CDU). The 24/7 Statewide Traffic Management Center (STMC) serves three primary functions: (1) It is the Traffic Operations Center (TOC) for the northern half of the state, (2) It provides for evening/weekend/holiday operations coverage for the entire state and (3) NJDOT is co-located with the New Jersey State Police and the New Jersey Turnpike Authority at the STMC to provide for a coordinated approach to handling traffic operations statewide. The 16/5 Traffic Operations Center South (TOCS) is responsible for coverage for the southern half of the state and monitors the Route 29 tunnel. The STMC handles coverage for TOCS during week nights (after 8:30 pm) and on weekends and holidays. The Safety Service Patrol (SSP) is deployed on congested corridors statewide to rapidly detect and clear incidents by providing safety for first responders and motorists. SSP also provides emergency assistance to disabled motorists. The 24/7 Central Dispatch Unit (CDU) is NJDOT's Emergency Call Center. The Traffic Incident Management (TIM) program is aimed at reducing delays due to traffic incidents. It provides for: (1) equipment and training for NJDOT's Incident Management Response Team (IMRT); (2) training and outreach for county and local emergency responders on methods to reduce traffic delays caused by incidents; (3) developing, printing and distributing diversion route manuals; (4) developing partnerships and outreach with local and state law enforcement organizations; and (5) maintaining a State Police Traffic Incident Management Unit.

Traffic Monitoring Systems

This program provides for the collection of essential traffic and roadway inventory data including traffic counts, vehicle classifications, truck weights, roadway video, automated mapping and various other geographical information system activities. Included in this item are the construction, reconstruction and restoration of Traffic Monitoring Systems (TMS) and continuous traffic counting installations; and acquisition of equipment to upgrade and to replace equipment which has failed. Site selection is made in accordance with federal requirements for the Traffic Monitoring Guide and the NJDOT's Traffic Monitoring System implementation plan that has been approved by the Federal Highway Administration. Funding is used for professional services to carry out the short-term traffic monitoring program, updates of the Straight Line Diagrams; and local road inventory database updates; for construction services for a contractor to replace in-road traffic monitoring sensors; to continue Data Warehouse Maintenance activities; and to initiate/update a Roadway Digital Imaging Program.

<i>Program/Project Name</i>	<i>Project ID Number: X47</i>
Traffic Signal Replacement	

This program provides funding for; purchase of materials, installation of new and upgraded traffic signals statewide, related improvements to the operation of signals. This program provides for the replacement of traffic signals on an annual basis, and assists regional operations in the rehabilitation and maintenance of the state's highway lighting system. It also includes the conversion to energy efficient LED indicators, and installation of generators to provide auxiliary power, which will enable traffic signals to function during times of extended power outages. Through the Traffic Signal Management System, which provides a condition rating of signal equipment integrated with crash data and Congestion Management System Data, this program (developed via consultant RFP, analyzing corridor segments and creating a safety ranking based on MUTCD compliance, pedestrian facilities, controller capabilities, method of detection, accessibility, and other factors) will prioritize signals for replacement based on the above factors. The results from establishing the priority locations will allow systematic replacement of aging signal equipment, optimization of the operation of signals, and promote maximum efficiency of intersections.

Tremley Point Connector Road	

The Tremley Point Connector Road is a new four-lane, predominantly pile-supported, approximately 1.1 mile long roadway/bridge that will cross the Rahway River, featuring two 12-foot lanes in each direction and 3-foot wide right shoulders. The redevelopment of the Tremley Point area of Linden has been the subject of numerous reports and analysis. The local roadway system in Linden is unable to support the increase in truck traffic anticipated by the redevelopment of the Tremley Point Brownfield into more than six million square feet of warehouse and distribution space. The Tremley Point area is located less than 10 miles from Port Elizabeth, Newark and Newark Liberty International Airport. The NJ Turnpike is currently advancing the Environmental Assessment document with the USCG for a Connector Road from Tremley Point in Linden to Industrial Highway in Carteret, which has access to NJ Turnpike Interchange 12. This project is multi-year funded.

Route 23, Hardyston Township Improvements

This project provides safety, operational and drainage improvements within three sections of Route 23 in Hardyston Twp., Sussex County; Northern/Laceytown Road, East Shore Road, and Holland Mountain Road. Within the Northern/Laceytown Road and the East Shore Road sections, localized operational and safety enhancements will be implemented with; minor geometric improvements, drainage upgrades, pavement resurfacing, pavement striping and marking and other safety countermeasures. The Holland Mountain Road section will be extensively reconstructed to improve intersection operation and enhance safety. This work will consist of widening Route 23 and Holland Mountain Road to accommodate through traffic and all turning movements at the intersection. A two-way left turn lane will be constructed on Route 23, at the Holland Mountain intersection, extending approximately 2,500 feet (0.45 mile) north of the intersection. A portion of Snufftown Road will also be reconstructed to improve the intersection alignment with Route 23 and Holland Mountain Road. A new traffic signal at the Route 23/Holland Mountain Road/Snufftown Road intersection will also be constructed. This project is multi-year funded.

Program/Project Name

Project ID Numbers: 07319B / 123660

Route 29, Cass Street to Calhoun Street, Drainage

This project is a breakout of Route 29, Drainage Improvements (DB# 07319). Flooding and drainage problems have been reported along Route 29 in the southern section of the original parent project. Based on available information, it is perceived that storm sewer systems and the Delaware River are primary causes of the flooding. Approximately 14 Tideflex valves and a flood wall extension of about 200 feet in length would address flooding by preventing the Delaware River from backing up into the existing storm sewer pipe systems within the Route 29 right-of-way. With these improvements, various locations of the roadway will be protected from events ranging between the 15 and 50-year floods in the river's main channel.

Route 52, Causeway Replacement, Contract A	

This project will provide for the replacement of 1.2 miles of the interior portion of the existing Rt. 52 Causeway between Elbow Island and Visitor Center Island in both directions. The bridges being replaced in this contract are Elbow Thorofare and Rainbow Thorofare. This portion of the new bridge will be a lower-level structure (i.e. approximately 15 feet to 20 feet above the water). In addition, as part of this project, access ramps will be constructed down onto Rainbow Island in both directions for fishing and recreational access. The southbound bridge toward Ocean City will contain a 10-foot multi-use sidewalk for bicycle as well as pedestrian use and will be separated from traffic with an approved traffic barrier system.

The construction of Contract A is funded under the federal GARVEE program. State Bonds have been issued to provide the necessary cash to award the contract. Repayment of the bonds (plus interest) will be provided from anticipated future federal apportionments over a 12-year period. This project is multi-year funded.

New Jersey Department of Transportation Projects**

<i>Program/Project Name</i>	<i>Project ID Numbers: 355A / 950541</i>
Route 295/42, Missing Moves, Bellmawr	

This project consists of new ramps and related improvements to enable motorists to make movements between I-295 and Route 42 which are not possible in the current configuration. Other project improvements include the re-striping of Route 55 Northbound, from one lane to two lanes, from the existing point, where Route 55 Northbound tapers from two lanes to one lane, up to the tie-in with Route 42 Northbound. The second lane on Route 55 Northbound will become a continuous auxiliary lane, up to the proposed entrance to new Ramp A, connecting Route 42 Northbound to I-295 Southbound. The existing Leaf Avenue ramps off Route 42 Northbound will be relocated approximately 750 feet to the South and will intersect with Benigno Blvd. The new exit location off Route 42 Northbound requires a ramp connection, separated from the mainline, to prevent queued traffic at the new intersection from mixing with mainline traffic. This ramp connection splits off from the Ramp A entrance on the left and runs parallel to Route 42 to the new intersection; which will be signalized. Benigno Blvd. will be realigned to meet Edgewood Avenue, and Wellwood Avenue will be extended to a T-intersection with Benigno Blvd. This project is multi-year funded.

<i>Program/Project Name</i>	<i>Project ID Numbers: N1301 / 133420</i>
Route 440, Bayonne Bridge Navigational Clearance Project	

This project entails increasing the air draft of the Bayonne Bridge by raising the roadway within the existing arch span by 64 feet, from 151 feet to 215 feet. Additionally, the new roadway will be wider (to better conform to AASHTO standards), and the 6-foot wide pedestrian walkway will be widened to a 12-foot wide shared-use path accommodating pedestrians and cyclists. A new higher roadway will be constructed within the existing constraints on the main span. The existing approach roads will be demolished and new, wider approaches will be constructed. The new approaches will have 8-foot wide outside shoulders and 4-foot wide inside shoulders. During construction, the median will be removable channelizer posts. Once the full bridge is completed, jersey barriers will be used in the median. The existing toll plaza will be demolished and replaced. Estimated duration of construction is about 3.5 years, during which time traffic will be reduced to one 12.5-foot lane per direction, with nightly road closures and 8 full weekend closures per year. ITS sign structures (including VMS, VLS, CCTV and road sensors) will be constructed along the rehabilitated roadway. (On the NY side the project is in The City of New York, Richmond County.)

SECTION VI

NJ TRANSIT PROJECT / PROGRAM DESCRIPTIONS

FY 2017 TRANSPORTATION CAPITAL PROGRAM New Jersey Transit Projects

<i>Program/Project Name</i>	<i>Project ID Number: T143</i>
ADA--Platforms/Stations	

Funding is provided for the design and construction of necessary improvements to make NJ TRANSIT's rail stations, and subway stations compliant with the Americans with Disabilities Act (ADA) including related track and infrastructure work. Funding is requested for upgrades, equipment purchase, platform extensions, and transit enhancements throughout the system and other accessibility improvements at non-key stations.

This project is funded under the provisions of Section 13 of P.L. 1995, c.108.

COUNTY: Various

Casino Revenue Fund	

State law provides 8.5% of the Casino Tax Fund to be appropriated for transportation services for senior and disabled persons. This element also supports capital improvements that benefit the senior and disabled populations. The law provides 85% of these funds to be made available to the counties through NJ TRANSIT for capital, operating, and administrative expenses for the provision of locally coordinated para-transit services. The amount each county receives is determined by utilizing an allocation formula based on the number of residents 60 years of age and over as reflected in the most recent U.S. Census Report.

This project is funded under the provisions of Section 13 of P.L. 1995, c.108.

New Jersey Transit Projects**

<i>Program/Project Name</i>	<i>Project ID Number: T907</i>
Delco Lead Safe Haven Storage and Re-inspection Facility Project	

Funding is provided to build the Delco Lead Safe Haven Storage and Re-Inspection Facility. The Delco Lead project is located in North Brunswick Township and the City of New Brunswick along the Northeast Corridor (NEC) rail line adjacent to the Conrail "Delco Secondary". The Safe Haven Storage will provide resilient storage that will protect equipment against damage resulting from a storm by accommodating the storage of approximately 150 electrified rail passenger cars. Combining this with the reconfiguration and improvement of the existing long freight track, storage of another 260 plus passenger rail cars may be possible. Also included in this project is the addition of a facility for rolling stock inspection and smaller repairs. The service and inspection facility will facilitate the rapid return of equipment to service following a storm event.

The source of the local funding is the State Transportation Trust Fund (TTF) in the amount of \$61,497,970. The STIP ID is DB#-T44, NEC Improvements. The \$61,497,970 includes \$30,000,000 of unspent funding appropriated in SFY14 and prior years for NJ TRANSIT's "NEC Improvements" program. In addition, NJ TRANSIT is allocating \$31,497,970 from the "NEC Improvements" program from the SFY15-24 Constrained Capital Program; including \$18,000,000 in SFY15, \$10,000,000 in SFY16 and \$3,497,970 in SFY17.

<i>Program/Project Name</i>	<i>Project ID Number: T908</i>
Hoboken Long Slip Flood Protection Project	

Funding is provided to reduce the risk of flooding to Hoboken Rail Yard and the City by filling the deteriorated "Long Slip" inlet inside the rail yard. This project would also improve disaster response and recovery by constructing new elevated tracks and boarding areas on the filled area. The elevated position of these tracks and platforms will permit rapid recovery of commuter rail services to and from Hoboken Yard and its associated Hudson Bergen Light Rail (HBLR), Port Authority Trans-Hudson (PATH), and ferry service. It will allow continued passenger service while the yard is being decommissioned in preparation of a major storm, and again as the yard is being restored for passenger operation after the storm. The source of the local funding is the State Transportation Trust Fund (TTF).

The source of local funding is the State Transportation Trust Fund (TTF) in the amount of \$48,849,478. The STIP ID is DB#-T55, Other Rail Station/Terminal Improvements. The \$48,849,478 includes \$15,000,000 of unspent funding appropriated in SFY14 and prior years for NJ TRANSIT's Other Rail Station/Terminal Improvements program. In addition, NJ TRANSIT is allocating \$33,849,478 from Other Rail Station/Terminal Improvements program from the SFY15-24 Constrained Capital Program; including \$19,000,000 in SFY15, \$10,000,000 in SFY16 and \$4,849,478 in SFY17.

NJ TRANSIT Grid Project	

Funding is provided to create a "microgrid" power generation and distribution system. NJ TRANSITGRID will be capable of supplying highly-reliable power during storms or other times when the centralized power grid is compromised. NJ TRANSITGRID will incorporate renewable energy, distributed generation, and other technologies to provide resilient power to key NJ TRANSIT stations, maintenance facilities, bus garages, and other buildings. NJ TRANSITGRID will also provide resilient electric traction power to allow NJ TRANSIT trains on critical corridors, including portions of the Northeast Corridor, to continue to operate even when the traditional grid fails. This project will directly benefit NJ TRANSIT and Amtrak. The source of the local funding is the State Transportation Trust Fund (TTF).

The source of local funding is the State Transportation Trust Fund (TTF) in the amount \$144,616,890. The STIP ID is DB#-T50, Signals and Communications/Electric Traction Systems program (S&C Program). The TTF component includes \$45,000,000 of unspent funding appropriated in SFY14 and prior years for NJ TRANSIT's from the S&C Program. In addition, NJ TRANSIT is allocating \$99,616,890 from the SFY15-24 Constrained Capital Program; including \$33,881,000 in SFY15, \$15,640,000 in SFY16, \$9,381,890 in SFY17; \$17,464,000 in SFY18 and \$23,250,000 in SFY from the S&C program.

Rail Rolling Stock Procurement	

This program provide funds for the replacement of rail rolling stock, including engineering assistance and project management, to replace over-aged equipment including rail cars, revenue service locomotives, and expansion of NJ TRANSIT rolling stock fleet (cars and locomotives) to accommodate projected ridership growth and other system enhancements over the next ten years. Funding is provided to support vehicles\equipment (for rail operations). Annual funds are provided for Comet V single-level car lease payments, Electric Locomotive lease payments, Diesel Locomotive lease payments, Dual Power Locomotives and Multi-Level rail car lease payments and other upcoming rolling stock lease payments. Pay-as-you-go funding is also programmed for Multi-Level vehicles and other rolling stock.

Toll Credit will be used as the non-federal match. An explanation of toll credit can be found in the Introduction Section of the STIP.

CMAQ:

Funding for Rail Rolling Stock Procurement will include CMAQ funds. Rail Rolling Stock Procurement is CMAQ eligible because it meets federal eligibility requirements. The project will provide funding for the purchase of Multi-Level Coaches and Multi-Level EMU vehicles. For the CMAQ justification see "CMAQ Report for NJ TRANSIT".

This project is funded under the provisions of Section 13 of P.L. 1995, c.108.

New Jersey Transit Projects**

<i>Program/Project Name</i>	<i>Project ID Number: T911</i>
Train Controls-Wayside Signals, Power & Communication Resiliency	

Funding is provided for the Train Controls infrastructure resiliency project. NJ TRANSIT's ten commuter rail lines and the light rail lines were impacted by Superstorm Sandy. This project involves rail line resiliency efforts for certain assets that are vulnerable to storm events, including critical life-safety signal and communications systems located on the Morris and Essex Line, the Pascack/Bergen Line, the Main Line and the Hudson-Bergen Light Rail Line. These lines lie in coastal and inland floodplains where storms could overtop the trackbed and potentially flood and damage critical signal, power and communications systems used to control train speed, switches and track choice, and following distances for safe operations.

The source of local funding is the State Transportation Trust Fund (TTF) in the amount of \$29,634,396. The STIP ID is DB#-T50, Signals and Communications/Electric Traction Systems. The \$29,634,396 from the Signals and Communications/Electric Traction Systems program is from the SFY15-24 Constrained Capital Program; including \$1,000,000 in SFY15, \$1,000,000 in SFY16, \$1,000,000 in SFY17, \$22,536,000 in SFY18 and \$4,098,396 in SFY19.

FY 2017 TRANSPORTATION CAPITAL PROGRAM New Jersey Transit Projects

<i>Program/Project Name</i>	<i>Project ID Number: T300</i>
Transit Rail Initiatives	

This program provides funding for transit expansion projects, including new station construction, ferry program, fixed guideway improvements (Rail, Light Rail, BRT, and Ferry), and related vehicle and equipment acquisition. Also included are FTA new starts projects authorized under New Jersey Urban Core or SAFETEA-LU. Potential projects in this category include (in no rank order): Northern Branch Rail; HBLR Extension to Secaucus; HBLR Secaucus-Meadowlands Connector; Passaic-Bergen rail service on the NYS&W east of Hawthorne using Diesel Multiple Unit (DMU) passenger equipment; Restoration of commuter rail service on the NYS&W west of Hawthorne; Port Morris Improvements; West Shore--Hoboken to West Haverstraw; NERL Elizabeth Segment from NJ TRANSIT'S Northeast Corridor Midtown Elizabeth Station to Newark Liberty International Airport via the Elizabeth Waterfront; Restoration of commuter rail service on the West Trenton line; River LINE LRT Capitol Extension; Second Phase of River LINE LRT/PATCO Extension; Route 1 BRT, Second Phase of NERL (Newark Penn Station to Newark Liberty International Airport); Commuter rail extension in Monmouth and Ocean Counties; Lehigh Third Track Capacity Improvements; Extension of Cape May Seashore Line north to Hammonton (to Atlantic City Rail Line); Commuter Rail extension to Phillipsburg, improvements on the Atlantic City Rail Line, new rail station improvements such as Atlantic City Line/River LINE connection, Moynihan Station, Penn Station New York access improvements and platform extensions, Penn Station New York Central Concourse, Penn Station New York West End Concourse, E-yard expansion, Bus Rapid Transit Initiatives, Park and Rides and Smart Card Technology Program along with other new systemwide, rail, bus, and light rail initiatives arising during the year.

The narrative above governs how the state Transportation Trust Funds that are appropriated in the state budget to "Transit Rail Initiatives" can be used. The Transit Rail Initiatives project is a state funded effort that is displayed here only for information purposes in order to give a better understanding of total transportation funding. As shown below, there is no Federal funding allocated to the Transit Rail Initiatives project in the first four constrained years. In compliance with the state budget and the language above, state Transit Rail Initiatives funds will be used to advance the projects listed above, some of which are also authorized under Federal law, but not yet funded with Federal dollars.

Funding is also provided to advance projects dependent on other non-federal (including private) funding, and/or state resources available beyond planned levels.

This project is funded under the provisions of Section 13 of P.L. 1995, c.108.

SECTION X

GLOSSARY

**FISCAL YEAR 2017
TRANSPORTATION CAPITAL PROGRAM
Glossary**

Table of Contents

Section 1 Capital Investment Strategy Categories / Asset Categories

Section 2 Core Missions

Section 3 Phases of Work

Section 4 Funding Categories

a. NJDOT

b. NJ TRANSIT

Section 5 Metropolitan Planning Organizations

GLOSSARY

The following serves as a guide to terms used in the Transportation Capital Program:

SECTION 1 CAPITAL INVESTMENT STRATEGY CATEGORIES / ASSET CATEGORIES

The New Jersey Statewide Capital Investment Strategy (SCIS) classifies projects according to the type of work to be done.

Airport Assets

Includes work that is intended to preserve, maintain and improve aviation facilities, for the development of an efficient air transportation system that responds to the needs of its users and the public. Administering the aviation system includes public-use airports that consist of a complex system of facilities operated by state, county, municipal and private entities.

Bridge Assets

Includes projects which are designed to keep existing bridges functioning and in a state of good repair, including work which rehabilitates or replaces existing bridges to meet current design standards. Examples of work included within this category are:

- Bridge capital maintenance
- Bridge deck rehabilitation and replacement
- Bridge management
- Bridge rehabilitation and replacement
- Dams

Capital Program Delivery

Includes program implementation costs for various phases of projects, including; construction, contractor support, planning programs and studies, scoping and design, right-of-way, utility work, and quality assurance.

Congestion Relief

Includes work that improves the flow of people and goods along roadways. Specific programs under this heading include; highway operational improvements, bottleneck improvements, missing links, major widening, intelligent transportation systems and travel demand management.

Local Systems Support

Provides for development and implementation of transportation improvements on local roadway networks. Examples of program categories within this heading are; local aid to counties, local aid to municipalities, bicycle/pedestrian, regional planning, and project development.

Mass Transit Assets

Includes light rail, and rail and bus physical assets required to maintain the transit system in a state-of-good-repair. Examples of work within this category include:

- Electric Traction
- Rail Stations, bus terminals, shelters
- Rolling Stock, rail cars and buses
- Signaling
- Structures
- Track

Multimodal Programs

Includes work that addresses improvements in/provisions for alternative modes of transportation. Program categories within this heading include; goods movement, bicycle/pedestrian, ferries, paratransit, intermodal connections, rail, and maritime.

Road Assets

Includes projects which are designed to keep the existing highway system functioning and in a state of good repair, including work which upgrades segments of the system to meet current design standards (e.g., safety treatments that are part of a general roadway project - such as; signs, guiderail, barrier curb, and traffic signals - as opposed to individual line-item programs, that include specific signs and/or traffic signals). Examples of work included in this category are:

- Drainage Management
- Environmental Remediation
- Highway Rehabilitation and Reconstruction
- Landscape
- Pavement Management System
- Resurfacing

Safety Management

Includes safety programs that are aimed at reducing the frequency and severity of crashes, and promoting the all-round engineering, education, and enforcement approach of "Safety First". "Safety First" is further reflected in several other NJDOT supported programs that utilize the 4E's (Engineering, Education, Enforcement, and Emergency Medical Services (quicker response and care)), and in other measures to enhance safety and reduce crashes. Examples of safety management programs are:

- ADA Curb Ramp Implementation
- Betterments, Safety
- Bicycle & Pedestrian Facilities/Accommodations
- Crash Reduction Program
- Highway Safety Improvement Program Planning
- Intersection Improvement Program (Project Implementation)
- Motor Vehicle Crash Records

- Pedestrian Safety Improvement Design and Construction
- Pedestrian Safety Improvement Program
- Rail Highway Grade Crossing, Federal
- Rail Highway Grade Crossing, State
- Restriping Program & Line Reflectivity Management System
- Rockfall Mitigation
- Safe Routes to School Program
- Safe Streets to Transit Program
- Segment Improvement Program
- Traffic Signal Replacement
- Transportation Safety Resource Center (TSRC)

Transportation Support Facilities Assets

Includes projects designed to preserve, maintain and improve physical plant infrastructure, including; office buildings, rest areas, maintenance facilities, toll plazas and existing park and ride locations. (Bus stops and train stations are included under Mass Transit Assets).

SECTION 2 CORE MISSION

The NJDOT's overall mission has been divided into five distinct Core Missions as part of Governor Christie's Performance Budgeting Initiative. Performance data and expenditures are tied to the Core Missions listed below.

10 - Infrastructure Preservation

Projects and programs with a primary focus on preserving, rehabilitating, or reconstructing existing physical assets, such as roads and bridges.

20 - Safety

Projects and programs with a primary focus on improving public health and safety of motorists, pedestrians, cyclists and other users of the transportation network by reducing transportation-related fatalities and injuries.

30 - Operations and Maintenance

Routine and regular expenditures required to: keep the highway surfaces, shoulders, roadsides, structures, and traffic control devices in usable condition; maintain facilities; purchase winter operations equipment, light trucks, cars, and construction equipment; and respond to winter storms and emergencies. Operations and Maintenance also includes administrative operations that support the other core missions (such as human resources, budget, and accounting).

40 - Mobility and Congestion Relief

Projects and programs with a primary focus on maintaining or increasing the movement of passengers and goods. These projects and programs may provide a safety and/or infrastructure preservation benefit, however, their goal is improving quality of life.

50 - Mass Transit

Projects or programs designed to move relatively large numbers of people at one time; utilizing passenger transportation services that operate on established schedules, along designated routes or lines, with specific stops.

SECTION 3 PHASES OF WORK

The stages of project development that occur during the project delivery process. The current NJDOT project delivery process, in order of occurrence, is Problem Statement (PS), Concept Development (CD), Preliminary Engineering (PE), Final Design (DES), Right of Way (ROW), Utilities (UTI), and Construction (CON). The terms apply to these various phases of work.

CAP - Capital Acquisition

The acquisition of rolling stock by NJ TRANSIT.

CD/LCD - Concept Development

The Concept Development phase identifies and compares reasonable alternatives and strategies that address a well-defined and well-justified Purpose and Need Statement, and establishes a Preliminary Preferred Alternative (PPA). The PPA is selected based on the following factors: environmental impacts, constructability, cost effectiveness, and length of time for construction. CD involves data collection, internal and external stakeholder coordination, and alternatives analysis. Along with the PPA, key products that are produced in this phase include the Purpose and Need Statement, the National Environmental Policy Act (NEPA) classification, and the Concept Development Report. CD denotes NJDOT's Concept Development phase; LCD denotes a Concept Development phase by a local entity (MPO, county, municipality).

CON - Construction

The Construction phase is the period of work involving the actual building of a project.

DES - Final Design

The purpose of the Final Design phase is to produce the project's construction contract documents (i.e., final plans, specifications, and cost estimate (PS&E)) for use in soliciting bids from prospective contractors and advancing the project to the Construction phase. DES includes the continuation and completion of environmental and engineering tasks initiated in the Preliminary Engineering phase (i.e., roadway design, bridge design, right of way and access engineering, utility engineering, environmental permits and clearances, and community outreach). The completion of those tasks will involve various internal

and external project stakeholders. Stakeholder coordination ranges from, onboard project review meetings with internal offices, to, efforts with local officials, the general public and other state and federal agencies. Efforts involving the public and local officials are guided by a project-specific public involvement action plan. DES is completed when the project is authorized for construction, which initiates the Construction phase of project delivery.

EC - Design and Construction

Funding is provided for design and/or construction costs.

ERC - Design, Right of Way and Construction

Funding is provided for design, right of way, and/or construction costs.

PE/LPE - Preliminary Engineering

The Preliminary Engineering phase involves performing engineering tasks and technical environmental studies to obtain formal community consensus (through a public information center) of the studies and to secure the approval of the environmental document. If a design exception is necessary on a project, preparation and approval of the Design Exception Report will occur during the PE phase. During PE a number of activities are simultaneously set in motion, based on the PPA, such as community involvement (meetings with affected property, business owners), agency consultation, environmental documentation, design level mapping, and the development of geometric design. PE denotes NJDOT Preliminary Engineering phase; LPE denotes preliminary engineering by a local entity (MPO, county, municipality).

PLS - Planning Study

A phase or type of work involving traffic studies needs analyses, corridor studies, and other work in advance of project development. See also "Concept Development."

PS - Problem Screening

The Problem Screening Phase is the entrance into the Capital Project Delivery Process for any potential project. The purpose of this phase is to investigate a potential transportation problem identified through a Problem Statement. The sources of the Problem Statements may include NJDOT Management Systems, Planning Studies, a Metropolitan Planning Organization, or internal and external stakeholders. This phase may involve a Problem Statement review, field investigation, and coordination with NJDOT Subject Matter Experts. Upon completion of a Problem Statement review, a recommendation for advancement or withdrawal is submitted to the Capital Program Committee (CPC) for review and approval.

The objective of the Problem Screening Phase is to effectively, efficiently, and consistently screen transportation problems in agreement with the Statewide Capital Investment Strategy (SCIS) and project prioritization criteria. Achieving this goal is expected to produce selective proposals that are consistent with the SCIS performance related goals, objectives, and investment targets for potential advancement while conforming to state

and federal requirements.

ROW - Right of Way

A general term denoting land, property, or an interest therein, usually in a strip acquired for, or devoted to, transportation purposes.

UTIL - Utility

In some cases, the utility relocation work associated with a project must be programmed separately from the actual construction phase of work. These items are shown under the "Utility" category.

SECTION 4 FUNDING CATEGORIES

Projects are funded under various funding categories, depending on the type of work.

a. NJDOT FUNDING CATEGORIES

BRIDGE-OFF

This federal-aid funding category provides funds for the rehabilitation or replacement of bridges defined as structurally deficient and/or functionally obsolete according to federal definitions. This funding is used for bridges that are off the federal-aid system.

CMAQ - Congestion Mitigation and Air Quality

This federal-aid funding category was established under the federal Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) to provide funding for projects that improve air quality and/or relieve congestion without adding new highway capacity. These funds are especially targeted for states, like New Jersey, with serious air quality problems to help meet their Clean Air Act obligations.

DEMO - Demonstration Funds

Federal transportation acts sometimes target specific projects in various states in addition to general programs for federal support. This funding category includes "demonstration" funding provided under ISTEA, as well as "high priority project" funding provided under Transportation Equity Act for the 21st Century (TEA-21) and Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). Projects with "demonstration", or "high priority project", funding often have special rules of use.

FBP – FHWA Ferry Boat Program

Federal funds that are allocated for improvements to ferry boats and ferry terminal facilities throughout the state.

HSIP - Highway Safety Improvement Program

This federal-aid funding category was established under SAFETEA-LU with the

purpose of significantly reducing traffic fatalities and serious injuries on all public roads in a comprehensive and strategic manner consistent with the State's Strategic Highway Safety Plan. Moving Ahead for Progress in the 21st Century Act (MAP-21) has continued this program with a focus on performance measures and targets.

LTAP – Local Technical Assistance Program

Federal funds that are allocated for LTAP centers that provide information and training to local governments and agencies to foster a safe, efficient, and environmentally sound surface transportation system by improving skills and increasing knowledge of the transportation workforce and decision makers.

NHFP-HWY - National Highway Freight Program

As established by the FAST Act, the National Highway Freight Program provides funding to improve the efficient movement of freight on the National Highway Freight Network (NHFN). NHFP supports several goals, including: infrastructure and operational improvements that strengthen economic competitiveness, reduce congestion, reduce the cost of freight transportation, improve reliability, and increase productivity; improving the safety, security, efficiency, and resiliency of freight transportation in rural and urban areas; improving the state of good repair of the NHFN; using innovation and advanced technology to improve NHFN safety, efficiency, and reliability; improving the efficiency and productivity of the NHFN; improving State flexibility to support multi-State corridor planning and address highway freight connectivity; and reducing the environmental impacts of freight movement on the NHFN.

NHFP-RAIL - National Highway Freight Program - Intermodal or Rail

In addition to improvements to the NHFN, the FAST Act establishes funding for surface transportation projects to improve the flow of freight into and out of a freight intermodal or freight rail facility. These projects include those within the boundaries of public or private freight rail or water facilities (including ports), and that provide surface transportation infrastructure necessary to facilitate direct intermodal interchange, transfer, and access into or out of the facility.

NHPP - National Highway Performance Program

As established by MAP-21, the National Highway Performance Program provides support for the construction of new facilities on the National Highway System (NHS), the condition and performance of the NHS, and achieving performance targets, as set by that State's asset management plan.

OTHER

This represents funding provided from other sources, including, but not limited to, bi-state and autonomous authorities, private entities, and local governments.

PL/PL-FTA - Planning

A federal-aid funding category that provides funds for the federally mandated

transportation planning process conducted within each Metropolitan Planning Organization.

RHC - Rail-Highway Grade Crossings Program

A federal funding category which is intended to develop and implement safety improvement projects to reduce the number and severity of crashes at public highway-rail grade crossings. Eligible program activities include signing and pavement markings at crossings, active warning devices, crossing surface improvements, sight distance improvements, grade separations, and the closing and consolidation of crossings.

RTP - Recreational Trails Program

Provides grants to public agencies and non-profit organizations for a variety of trail projects. The NJ Department of Environmental Protection, Division of Parks and Forestry, administers the program.

SPR/SPR-FTA - Statewide Planning and Research

Federal law requires that a percentage of the funds that are allocated to states for highway improvements be devoted to planning and research activities.

STATE

The "STATE" or "TTF" category is used to show the disposition of funding received from the New Jersey Transportation Trust Fund.

STP - Surface Transportation Program

A federal-aid funding category, established under ISTEA, which encompasses funding previously made available under various smaller federal-aid categories (STP-NJ denotes funding provided to NJTPA; STP-STU denotes funding provided to DVRPC; STP-SJ denotes funding provided to SJTPO).

TAP - Transportation Alternatives Program

Consolidates funding from FHWA's former Transportation Enhancements, Recreational Trails, and Safe Routes to School programs. MAP-21 eliminated the 10 percent set-aside under STP for "transportation enhancements" and replaced it with the "transportation alternatives" program. Provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, community improvement activities, and environmental mitigation; recreational trail program projects; safe routes to school projects; and projects for the planning, design or construction of boulevards and other roadways largely in the right-of-way of former Interstate System routes or other divided highways.

b. NJ TRANSIT FUNDING CATEGORIES

NJ Transit funding categories are generally indicated by reference to federal statutory categories and are identified as follows:

CASINO REVENUE

Annual allocation of 8.5% from the Casino Revenue Fund which is appropriated specifically for transportation services for senior citizen and disabled residents.

CMAQ - Congestion Mitigation and Air Quality

This federal-aid funding category was established under ISTEA to provide funding for projects that improve air quality and/or relieve congestion without adding new highway capacity. These funds are especially targeted for states, like New Jersey, with serious air quality problems to help meet their Clean Air Act obligations.

MATCH

Local funds that are needed in order to receive a match in federal funding (Job Access and Reverse Commute (JARC) and SECT 5311).

METRO-NORTH

Funding received from the Metro-North Railroad of the New York Metropolitan Transportation Authority.

OPER - Operating

Fare-box generated revenue funds.

OTHER

Represents funding provided from other sources, including but not limited to; bi-state and autonomous authorities, private entities, and local governments.

SECT 5307 - Section 5307

Under MAP-21, this program has been consolidated to include the JARC program (formally SECT 5316). Federal Transit Administration (FTA) Urbanized Area Formula Program, including funding for Transportation Enhancements (SECT 5307-TE), Transportation Alternatives Program (SECT 5307-TAP), and Associated Transit Improvements (SECT 5307-ATI).

SECT 5310 - Section 5310

Provides formula funding to increase the mobility of seniors and persons with disabilities. The former New Freedom Program (SECT 5317) was folded into this program.

SECT 5311 - Section 5311

Federal funding is provided for rural public transportation programs (formerly known as the Section 18 Program). JARC program funds are also eligible under the Rural Area Formula Program.

SECT 5324 - Section 5324

Assists states and public transportation systems with emergency-related expenses. Emergencies are defined as, natural disasters affecting a wide area, or a catastrophic failure from an external cause for which the Governor of a state has declared an emergency or the President has declared a major disaster. This program funds capital projects to protect, repair, reconstruct or replace equipment and facilities. It also funds transit agency operating costs: evacuation; rescue operations; establishing temporary public transportation service or changing public transportation route service before, during, or after an emergency in an area directly affected.

SECT 5337 - Section 5337

MAP-21 established a new formula-based State of Good Repair grant program dedicated to repairing and upgrading the nation's rail transit systems along with high-intensity motor bus systems that use high-occupancy vehicle lanes, including bud rapid transit (BRT). This program replaces the Fixed Guideway Modernization program (SECT 5309). Projects are limited to replacement and rehabilitation, or capital projects required to maintain public transportation systems in a state of good repair. Projects must be included in a Transit Asset Management Plan to receive funding. The new formula comprises: (1) the former Fixed Guideway Modernization formula; (2) a new service-based formula; and (3) a new formula for buses on HOV lanes.

SECT 5339 - Section 5339

A formula grant program which replaces Section 5309. This capital program provides funding to replace, rehabilitate, and purchase buses and related equipment, and to construct bus-related facilities. Funds are eligible to be transferred by the state to supplement urban and rural formula grant programs (SECT 5307 and SECT 5311, respectively).

STATE

The "STATE" category is used to show the disposition of funding received from the New Jersey Transportation Trust Fund.

STP - Surface Transportation Program

A federal-aid funding category, established under ISTEA, which encompasses funding previously made available under various smaller federal-aid categories (STP-NJ denotes funding provided to NJTPA; STP-STU denotes funding provided to DVRPC; STP-SJ denotes funding provided to SJTPO).

TAP - Transportation Alternatives Program

Consolidates funding from FHWA's former Transportation Enhancements, Recreational Trails, and Safe Routes to School programs. MAP-21 eliminated the 10 percent set-aside under STP for "transportation enhancements" and replaced it with the "transportation alternatives" program. Eligible activities are broadly defined, and, with respect to transit, include: construction, planning and design of infrastructure-related projects and systems that will provide safe routes for non-drivers (including children, older adults and individuals with disabilities) to access daily needs, and for the preservation and rehabilitation of historic transportation facilities.

SECTION 5 METROPOLITAN PLANNING ORGANIZATIONS

Metropolitan Planning Organizations (MPOs) serve as the forum for cooperative transportation decision making for metropolitan planning areas as required by federal regulations. MPOs consist of representatives of state and local governments and major transportation agencies. There are three MPOs in New Jersey:

DVRPC - Delaware Valley Regional Planning Commission

The MPO covering the counties of Mercer, Burlington, Camden, and Gloucester.

NJTPA - North Jersey Transportation Planning Authority

The MPO covering the counties of Bergen, Essex, Hudson, Hunterdon, Middlesex, Monmouth, Morris, Ocean, Passaic, Somerset, Sussex, Union and Warren.

SJTPO - South Jersey Transportation Planning Organization

The MPO covering the counties of Cape May, Atlantic, Cumberland, and Salem.
