**PERMIT**

|   |   |  |
|---|---|--|
| <p>In accordance with the laws and regulations of the State of New Jersey, the Department of Environmental Protection hereby grants this permit to perform the activities described below. This permit is revocable with due cause and is subject to the limitations, terms and conditions listed below and on the attached pages. For the purpose of this document, "permit" means "approval, certification, registration, authorization, waiver, etc." Violation of any term, condition or limitation of this permit is a violation of the implementing rules and may subject the permittee to enforcement action.</p>  |   | Approval Date<br>August 16, 2016   |
|   |   | Expiration Date<br>August 15, 2021   |

| <b>Description of Authorized Activities:</b><br><br>This permit grants permission to replace the Route 9 bridge crossing over Waretown Creek, relocate 3 underground gas lines, and temporarily relocate an above ground utility line, in the Township of Ocean, Ocean County. This permit also grants permission to disturb of 0.014 of an acre of freshwater wetlands and 0.133 of an acre of freshwater wetlands transition area for the bridge replacement under General Permit No. 10A, the disturbance of 0.041 of an acre of freshwater wetlands for the underground utility relocation under General Permit No. 2, and the disturbance of 0.213 of an acre for the overhead utility line under General Permit No. 21. |   |  |
| <b>Prepared by:</b><br><br>Chingwah Liang  | <b>Received and/or Recorded by County Clerk:</b>  |  |
| THIS PERMIT IS NOT EFFECTIVE AND NO CONSTRUCTION APPROVED BY THIS PERMIT, OR OTHER REGULATED ACTIVITY, MAY BE UNDERTAKEN UNTIL THE APPLICANT HAS SATISFIED ALL PRE-CONSTRUCTION CONDITIONS AS SET FORTH HEREIN.   |   |  |
| <p align="center"><b>This permit is not valid unless authorizing signature appears on the last page.</b></p>  |   |  |

**SPECIAL CONDITIONS:**

1. For the purposes of this permit, the Department has determined that this project is not a Major Development as defined in the Stormwater Management rules at N.J.A.C. 7:8-1.2. Therefore, the Department did not review the project for compliance with these rules.
2. All excavated material and dredge material shall be disposed of in a lawful manner. The material shall be placed outside of any flood hazard area, riparian zone, regulated water, freshwater/coastal wetlands and adjacent transition area, and in such a way as to not interfere with the positive drainage of the receiving area.
3. All sediment barriers and other soil erosion control measures shall be installed prior to commencing any clearing, grading or construction onsite, and shall be maintained in proper working condition throughout the entire duration of the project. In addition, the permittee will be responsible for the installation of a sediment barrier around all disturbed soils, which is sufficient to prevent the sedimentation of the remaining wetlands and transition area.
4. Construction equipment shall not be stored, staged or driven within any channel, freshwater wetland or transition area, unless expressly approved by this permit and/or described on the approved plans.
5. Vegetation within 50 feet of the top of the bank shall only be disturbed in the areas specifically shown on the approved drawing(s). No other vegetation within 50 feet of the top of any stream bank onsite shall be disturbed for any reason. This condition applies to all channels onsite regardless of the contributory drainage area.
6. Upon completion of the project, all temporarily disturbed areas within 50 feet of the top of any stream bank onsite shall be restored to original topography and replanted with indigenous, non-invasive vegetation in accordance with N.J.A.C. 7:13-11.2.
7. In order to protect the fishery resources in the Waretown Creek, any proposed grading or construction activity, which could introduce sediment into State open waters or which could cause an increase in the natural level of turbidity is prohibited between **March 1 through June 30** of each year. Furthermore, any activity outside a channel but within a riparian zone, which would likely introduce sediment into the channel and/or increase its turbidity, is also prohibited during this period. The Department reserves the right to suspend all regulated activities onsite should it be determined that the applicant has not taken proper precautions to ensure continuous compliance with this condition.
8. **Within 60 days of the issuance of this permit**, the permittee shall submit a proposal to mitigate for the permanent loss of 0.006 acres of grassed and 0.104 acres of forested riparian zone vegetation. The proposal shall be designed in accordance with the standards at N.J.A.C. 7:13-13.
9. **At least 90 days prior to the initiation of regulated activities authorized by this permit**, the permittee shall submit a mitigation proposal to the Division of Land Use Regulation (Division) for review and approval. Activities authorized by this permit shall not begin until the permittee has obtained written approval of a mitigation plan from the Department (N.J.A.C. 7:13-13.2(b)).
10. All mitigation shall be conducted prior to or concurrent with the regulated activity that causes the disturbance. (N.J.A.C. 7:13-13.3(a)1). Concurrent means that at any given time, the mitigation must track at the same or greater percentage of completion as the project as a whole.

11. Prior to the initiation of regulated activities authorized by this permit, the permittee shall sign a Department approved conservation restriction to protect the mitigation area from future development that would remove the vegetation planted. (N.J.A.C. 7:13-13(g)) The conservation restriction shall conform to the format and content of the rules at N.J.A.C. 7:13-14 and the Riparian Zone Mitigation Area model located at <http://www.nj.gov/dep/landuse/forms/index.html>. The restriction shall be included on the deed and recorded in the office of the County Clerk (the Registrar of Deeds and Mortgages in some counties) in the county wherein the lands of the mitigation project are located. A metes and bounds description shown on a map must be included within the recorded conservation restriction. Within 10 days of filing the conservation restriction, the permittee must send a copy of the conservation restriction to the attention of the Mitigation Unit Supervisor, NJDEP, Division of Land Use Regulation at Mail Code 501-02A, P.O. Box 420, Trenton, NJ 08625-0420.
12. The permittee shall monitor the riparian project for at least 5 years beginning the year after the riparian zone mitigation project has been completed (N.J.A.C. 7:13-13.11(c)). The permittee shall submit monitoring reports to the Division of Land Use Regulation, no later than December 31st of each full monitoring year.
  - a. All monitoring reports except the final one should include the requirements and goals of the mitigation proposal and a detailed explanation of the ways in which the mitigation has or has not achieved progress toward those goals. If mitigation has not achieved progress, the report shall also include a list of corrective actions to be implemented and a timeline for completion.
  - b. The final monitoring report must include documentation and data demonstrating that:
    1. The goals of the riparian zone mitigation as stated in the approved riparian zone mitigation proposal and the permit conditions have been satisfied.
    2. At least 85 percent of the mitigation plantings have survived and that at least 85 percent of the mitigation area is established with native species similar to ones identified on the mitigation planting plan. All plant species in the mitigation area must be healthy and thriving. All trees must be at least 5 feet in height; and
    3. The site is less than 10 percent occupied by invasive or noxious species; and
    4. The conservation restriction for the mitigation site has been executed and recorded.
13. If the riparian mitigation project does not meet the success criteria established above the project shall be considered a failure and the permittee shall submit a revised riparian mitigation plan. The revised plan shall be submitted within 60 days of receipt of notification from the Division indicating the riparian mitigation project was a failure.
14. If the Division determines that the riparian zone mitigation project is not constructed in conformance with the approved plan, the permittee will be notified in writing by the Department and will have 60 days to submit a proposal to indicate how the project will be corrected.

15. **PROVISIONS OF THE FRESHWATER WETLAND GENERAL PERMIT NOS. 2, 10A AND 21**

This permit authorizes the disturbance of 0.014 of an acre of freshwater wetlands and 0.133 of an acre of freshwater wetlands transition area for the bridge replacement under General Permit No. 10A, the disturbance of 0.041 of an acre of freshwater wetlands for the underground utility relocation under General Permit No. 2, and the disturbance of 0.213 of an acre for the overhead utility line under General Permit No. 21. Any additional disturbance of freshwater wetlands, wetland transition areas and/or State open waters shall be considered a violation of the Freshwater Wetlands Protection Act unless a permit is obtained prior to the start of the disturbances from the Division of Land Use Regulation. This permit to conduct a regulated activity in a wetland or open water includes the Division's approval of a Water Quality Certificate for these activities.

16. Any pipes laid through wetlands, transition areas, or State open water shall be properly sealed so as to prevent leaking or infiltration. Pipes and backfilled materials shall be placed entirely beneath the pre-existing ground elevation.
17. The permanently maintained clearing over the utility line shall be no wider than **15 feet**.
18. Any excavation within the wetland or wetland transition area, shall be backfilled to the preexisting elevation and the uppermost 18 inches of the excavation shall be backfilled with the original topsoil material.
19. The permittee shall adhere to managing the Right of Ways according to DFW/ENSP's power line maintenance BMP's as found in "No-Harm/Best Management Practices for Wildlife Habitat Along Utility-Line Right of Ways" last updated July 23, 2004.
20. The permittee shall ensure that the activities do not interfere with the natural hydraulic characteristics of the wetlands, transition area, or State open water.
21. The permittee shall mitigate for the permanent loss of 0.213 acres of forested wetlands through an on-site or off-site creation, restoration or enhancement project or with the purchase of credits from a mitigation bank serving the appropriate watershed management area in accordance with the mitigation hierarchy. (N.J.A.C. 7:7A-15 et seq.)
22. All mitigation shall be conducted prior to or concurrent with the construction of the approved project (N.J.A.C. 7:7A-15.3(a)1). Concurrent means that at any given time, the mitigation must track at the same or greater percentage of completion as the project as a whole.
23. If the permittee fails to perform mitigation within the applicable time period the acreage of mitigation required shall be increased by 20 percent each year after the date mitigation was to begin (N.J.A.C. 7:7A-15.3(b)).
24. At least 90 days prior to the initiation of regulated activities authorized by this permit, the permittee shall submit a mitigation proposal to the Division of Land Use Regulation (Division) for review and approval. Activities authorized by this permit shall not begin until the permittee has obtained written approval of a mitigation plan from the Department (N.J.A.C. 7:7A-15.11(a)1).

25. If the applicant is considering obtaining land to satisfy a mitigation requirement, the Department strongly recommends that the permittee obtain the Division's conceptual review and approval of any land being considered as a potential mitigation area.
26. As of the date of this permit, there are no mitigation banks serving your project area. Additional banks may be approved at any time, so please contact the Mitigation Unit for the most up to date service area information if you would like additional options.
27. If the permittee is considering conducting a creation, restoration or enhancement project, the following conditions shall apply:
  - a. **Prior to the initiation of regulated activities** authorized by this permit the permittee shall submit a final design of the mitigation project for approval and include all of the items listed on the checklist entitled Checklist for Completeness: Creation, Restoration or Enhancement for a Freshwater Wetland Mitigation Proposal located at <http://www.nj.gov/dep/landuse/forms/index.html>.
  - b. **Prior to the completion of the mitigation project**, the permittee shall complete, sign and file with the County Clerk (the Registrar of Deeds and Mortgages in some counties), a conservation restriction that meets the requirements of N.J.A.C. 7:7A-15.14. The conservation restriction shall include the wetland and required transition area and conform to the format and content of the Wetlands Mitigation Area model conservation restriction that is available at: <http://www.nj.gov/dep/landuse/forms/index.html>. The applicant is required to include a metes and bounds description shown on a map. Within 10 days of filing the conservation restriction, the permittee must send a copy of the conservation restriction to the Mitigation Unit, NJDEP Division of Land Use Regulation for verification. (N.J.A.C. 7:7A-15.14(a))
  - c. The permittee shall notify the Mitigation Unit at the Division of Land Use Regulation in writing **at least 30 days prior to the start of construction of the wetland mitigation project** to arrange an on-site pre-construction meeting among the permittee, the contractor, the consultant and the Division.
  - d. To ensure the intent of the mitigation design and its predicted wetland hydrology is realized in the landscape, the mitigation designer shall be present on-site during all critical stages of mitigation construction and during the restoration of any temporarily impacted areas. Critical stages of construction include but are not limited to herbicide applications, earthmoving activities, planting, and inspections.
  - e. The permittee shall be responsible for ensuring that best management practices are used throughout construction to control the spread and colonization of highly invasive plants. Specifically, all equipment, especially tracks and tires, must be thoroughly cleaned every time equipment or vehicles move from an area containing invasive plants or from off-site to the mitigation area. In addition, soil containing root fragments and above-ground vegetative material from invasive plants shall be carefully managed during earthmoving activities and disposed of at a suitable off site location rather than mulched and reused or stockpiled elsewhere on the site. For information on the specific species that are considered to be invasive, please refer to the Invasive Plant Atlas at <http://www.invasiveplantatlas.org/index.html>.
  - f. In the event that changes to the mitigation design are necessary to ensure success of the project as a result of on-site conditions, the mitigation designer shall immediately notify the Division in writing and submit an alternative plan which achieves the proposed wetland conditions. The Division shall review the plan in accordance with N.J.A.C. 7:7A-15.15. Any

modifications to the plan that are reviewed and approved by the Division must be shown on a signed and sealed revised plan. The As-Built plans required as a part of the Construction Completion Report may serve as the signed and sealed revised plan required to be submitted as part of the construction modification process described above if time constraints warrant such action and have been approved by the Division in writing.

- g. **Within 30 days of final grading of the mitigation site and prior to planting**, the permittee shall notify the Mitigation Unit at the Division of Land Use Regulation in writing to arrange a post-grading construction meeting among the permittee, contractor, consultant and the Division.
- h. **Within 30 days following the final planting of the mitigation project**, the permittee shall submit a Construction Completion Report to the Division detailing as-built conditions (see below) and any changes to the approved mitigation plan that were made during construction (N.J.A.C. 7:7A-15.16). The Construction Completion Report shall contain, at a minimum, the following information:
  - i. A completed Wetland Mitigation Project Completion of Construction Form. This form is located at <http://www.nj.gov/dep/landuse/forms/index.html> and certifies that the mitigation project has been constructed as designed and that the proposed area of wetland creation, restoration or enhancement has been accomplished;
  - ii. As-Built plans which depict final grade elevations at one foot contours and include a table of the species and quantities of vegetation that were planted including any grasses that may have been used for soil stabilization purposes; and
  - iii. Photos of the constructed wetland mitigation project with a photo location map as well as the GPS waypoints in NJ state plane coordinates NAD 1983.
- j. **Within 30 days following final planting of the mitigation project**, the permittee shall post the mitigation area with permanent signs which identify the site as a wetland mitigation project and that all-terrain vehicle use, motorbike use, mowing, dumping, draining, cutting and/or removal of plant materials is prohibited and that violators shall be prosecuted and fined to the fullest extent under the law. The signs must also state the name of the permittee, a contact name and phone number, and the Department's permit number.
- k. The permittee shall monitor (forested and/or shrub scrub wetland mitigation projects for 5 full growing seasons and emergent wetland or State open water mitigation projects for 3 full growing seasons) beginning the year after the mitigation project has been completed. The permittee shall submit monitoring reports to the Division of Land Use Regulation no later than December 31<sup>st</sup> of each full monitoring year (N.J.A.C. 7:7A-15.16(c)). All monitoring reports must include the standard items identified in the checklist entitled, "Wetland Mitigation Monitoring Project Checklist", which can be found at <http://www.nj.gov/dep/landuse/forms/index.html>.
- l. Once the required monitoring period has expired and the permittee has submitted the final monitoring report, the Division will make the finding that the mitigation project is either a success or a failure. This mitigation project will be considered successful if the permittee demonstrates all of the following:
  - i. That the goals of the wetland mitigation project, including acreage and the required transition area, as stated in the approved wetland mitigation proposal and the permit have been satisfied. The permittee shall submit a field wetland delineation of the wetland mitigation project based on the Federal Manual for Identifying and

Delineating Jurisdictional Wetlands (1989) which shows the exact acreage of State open waters, emergent, scrub/shrub and/or forested wetlands in the mitigation area;

- ii. The site has an 85 percent survival and 85 percent area coverage of the mitigation plantings or target hydrophytes, which are species native to the area and similar to ones identified on the mitigation planting plan. All plant species in the mitigation area must be healthy and thriving and all trees must be at least five feet in height;
  - iii. The site has less than 10 percent coverage by invasive or noxious species.
  - iv. The site contains hydric soils or there is evidence of reduction occurring in the soil; and,
  - v. The proposed hydrologic regime as specified in the mitigation proposal has been satisfied.
- m. The permittee is responsible for assuming all liability for any corrective work necessary to meet the success criteria established above (N.J.A.C. 7:7A-15.16(f)). The Division will notify the permittee in writing if the mitigation project is considered to be a failure. Within 30 days of notification, the permittee shall submit a revised mitigation plan to meet the success criteria identified above for Division review and approval. The financial surety, if required, will not be released by the Division until such time that the permittee satisfies the success criteria as stipulated above.

#### STANDARD CONDITIONS:

28. **Responsibilities:**

- a. The permittee, its contractors and subcontractors shall comply with all conditions of this permit, authorizing and/or supporting documents and approved plans and drawings.
- b. A copy of this permit, other authorizing documents, records and information including all approved plans and drawings shall be maintained at the authorized site at all times and made available to Department representatives or their designated agents upon request.

29. **Permit modification:** Plans and specifications in the application and conditions imposed by this permit shall remain in full force and effect so long as the proposed development or any portion thereof is in existence, unless modified by the Department. No change in plans or specifications upon which this permit is issued shall be made except with the prior written permission of the Department. The filing of a request to modify an issued permit by the permittee, or a notification of planned changes or anticipated noncompliance does not stay any condition of this permit.

30. **Duty to minimize environmental impacts:** The permittee shall take all reasonable steps to prevent, minimize or correct any adverse impact on the environment resulting from activities conducted pursuant to the permit, or from noncompliance with the permit. The permittee shall immediately inform the Department of any unanticipated adverse effects on the environment not described in the application or in the conditions of this permit. The Department may, upon discovery of such unanticipated adverse effects, and upon the failure of the permittee to submit a report thereon, notify the permittee of its intent to suspend the permit

31. **Proper site maintenance:** While the regulated activities are being undertaken, neither the permittee, its contractors nor subcontractors shall cause or permit any unreasonable interference with the free flow of a regulated feature by placing or dumping any materials, equipment, debris

or structures within or adjacent to the regulated area. Upon completion or abandonment of the work, the permittee, its contractors or subcontractors shall remove and dispose of in a lawful manner all excess materials, debris, equipment, silt fences and other temporary soil erosion and sediment control devices from all regulated areas. Only clean non-toxic fill shall be used where necessary.

32. **Sediment control:** Development which requires soil disturbance, creation of drainage structures, or changes in natural contours shall conduct operations in accordance with the latest revised version of "Standards for Soil Erosion Sediment Control in New Jersey," promulgated by the New Jersey State Soil Conservation Committee, pursuant to the Soil Erosion and Sediment Control Act of 1975, N.J.S.A. 4:24-42 et seq. and N.J.A.C. 2:90-1.3-1.14.
33. **Rights of the State:**
- a. This permit does not convey any property rights of any sort, or any exclusive privilege.
  - b. Upon notification and presentation of credentials, the permittee shall allow Department representatives or their designated agents, to enter upon the project site and/or where records must be kept under the conditions of this permit, inspect at reasonable times any facilities, equipment, practices or operations regulated or required under the permit, and sample or monitor for the purposes of determining compliance. Failure to allow reasonable access shall be considered a violation of this permit and subject the permittee to enforcement action.
  - c. The issuance of this permit shall in no way expose the State of New Jersey or the Department to liability for the sufficiency or correctness of the design of any construction, structure or structures. Neither the State nor the Department shall, in any way, be liable for the loss of life or property which may occur by virtue of the activity of development resulting from any permit.
34. **Duty to Reapply:** If the permittee wishes to continue an activity covered by the permit after the expiration date of the permit authorization, the permittee must apply for and obtain a new permit authorization.
35. **Transfer of Permit:** This permit may not be not transferable to any person unless the transfer is approved by the Department. Please refer to the applicable rules for more information.
36. **Other Approvals:** The permittee must obtain any and all other Federal, State and/or Local approvals. Authorization to undertake a regulated activity under this permit does not indicate that the activity also meets the requirements of any other rule, plan or ordinance.
37. **Noncompliance:**
- a. Any noncompliance with this permit constitutes a violation, and is grounds for enforcement action, as well as modification, suspension and/or termination of the permit.
  - b. The permittee shall immediately report to the Department by telephone at (877) 927-6337 any noncompliance that may endanger health or the environment. In addition, the permittee shall report all noncompliance to Bureau of Coastal and Land Use Compliance and Enforcement, 401 E. State Street, 4th Floor, P.O. Box 420, Mail Code: 401-04C, Trenton, NJ 08625, in writing within five business days of the time the permittee becomes aware of the noncompliance. The written notice shall include: a description of the noncompliance and its cause; the period of noncompliance, including exact dates and

times, and, if the noncompliance has not been corrected, the anticipated length of time it is expected to continue; and steps taken or planned to reduce, eliminate and prevent recurrence of the noncompliance. Such notice shall not, however, serve as a defense to enforcement action if the project is found to be in violation of this chapter.

38. **Appeal of Permit:** In accordance with the applicable regulations, any person who is aggrieved by this decision or any of the conditions of this permit may request a hearing within 30 days after notice of the decision is published in the DEP Bulletin. This request must include a completed copy of the Administrative Hearing Request Checklist. The DEP Bulletin is available through the Department's website at <http://www.nj.gov/dep/bulletin> and the Checklist is available through the Division's website at [http://www.nj.gov/dep/landuse/download/lur\\_024.pdf](http://www.nj.gov/dep/landuse/download/lur_024.pdf). In addition to your hearing request, you may file a request with the Office of Dispute Resolution to engage in alternative dispute resolution. Please see the website [www.nj.gov/dep/odr](http://www.nj.gov/dep/odr) for more information about this process.

#### APPROVED PLANS:

The drawings hereby approved are sixteen (16) sheets, ten (10) of which were certified by Nat Kasbekar, P.E., dated as noted, unrevised, unless otherwise noted, and entitled:

"NEW JERSEY DEPARTMENT OF TRANSPORTATION, BUREAU OF STRUCTURAL ENGINEERING, GENERAL PLAN AND ELEVATION, ROUTE US 9, CONTRACT NO. 078083160", sheet B2 of B14, undated

"NEW JERSEY DEPARTMENT OF TRANSPORTATION, BUREAU OF STRUCTURAL ENGINEERING, CROSS SECTION AND PROFILE, ROUTE 9, CONTRACT NO. 078083160", sheet B3 of B14, undated

"NEW JERSEY DEPARTMENT OF TRANSPORTATION, TYPICAL SECTIONS, ROUTE 9 OVER WARETOWN CREEK, CONTRACT NO.", sheet TS-01, undated

"NEW JERSEY DEPARTMENT OF TRANSPORTATION, CONSTRUCTION PLANS, ROUTE 9 OVER WARETOWN CREEK, CONTRACT NO.", sheets C-1 to C-6, undated

"NEW JERSEY DEPARTMENT OF TRANSPORTATION, TEMPORARY UTILITY CONSTRUCTION PLAN, ROUTE 9 OVER WARETOWN CREEK, CONTRACT NO.", sheet TU-1, undated

and the remaining six (6), which were prepared by The RBA Group, dated and unrevised, unless otherwise noted, entitled:

"NEW JERSEY DEPARTMENT OF TRANSPORTATION, ROUTE 9 OVER WARETOWN CREEK, CROSS-SECTION AND PROFILE OF GAS MAINS UNDER STREAM, OCEAN TOWNSHIP, OCEAN COUNTY", sheet 1 of 1, dated July 14, 2016, last revised August 11, 2016

"NEW JERSEY DEPARTMENT OF TRANSPORTATION, EXISTING BRIDGE PLAN, ROUTE 9 OVER WARETOWN CREEK, CONTRACT NO.", sheet unnumbered, dated May 23, 2016

"NEW JERSEY DEPARTMENT OF TRANSPORTATION, ENVIRONMENTAL PLANS ROUTE 9 OVER WARETOWN CREEK CONTRACT NO.," sheets EP-3, 4, and 5, each sheet dated February 2016

“NEW JERSEY DEPARTMENT OF TRANSPORTATION, RIPARIAN ZONE DISTURBANCE PLAN ROUTE 9 OVER WARETOWN CREEK CONTRACT NO.”, sheet EP-4A, dated February 2016

If you need clarification on any section of this permit or conditions, please contact the Division of Land Use Regulation’s Technical Support Call Center at (609) 777-0454.
