## PERMIT

<p>In accordance with the laws and regulations of the State of New Jersey, the Department of Environmental Protection hereby grants this permit to perform the activities described below. This permit is revocable with due cause and is subject to the terms, conditions, and limitations listed below and on the attached pages. For the purpose of this document, "permit" means "approval, certification, registration, authorization, waiver, etc." Violation of any term, condition, or limitation of this permit is a violation of the implementing rules and may subject the permittee to enforcement action.</p>		<p><b>Approval Date</b> September 1, 2022</p>
		<p><b>Expiration Date</b> August 31, 2027</p>
<p><b>Permit Number(s):</b> 0000-17-0020.1 LUP220001</p>	<p><b>Type of Approval(s):</b> Flood Hazard Area Individual Permit Freshwater Wetlands GP 10A Freshwater Wetlands GP 2</p>	<p><b>Governing Rule(s):</b> N.J.A.C. 7:13-1.1(b) N.J.A.C. 7:7A-1.1(a)</p>
<p><b>Permittee:</b> New Jersey Department of Transportation c/o John Mikusa 1035 Parkway Avenue PO Box 600 Trenton, NJ 08625</p>	<p><b>Site Location:</b> Block(s) &amp; Lot(s): RT. 130 ROW from Westfield Ave. to Main Street Municipalities: East Windsor Twp. and Hightsown Boro.; Cranbury Twp. Counties: Mercer; Middlesex</p>	
<p><b>Description of Authorized Activities:</b></p> <p>This document authorizes the disturbance to regulated areas for the milling and resurfacing of an existing roadway, curb ramp improvements, improvement to geometric deficiencies, installation of fiber optic communication trunk line and other improvements along the Route 130 corridor on the parcel(s) referenced above.</p> <p><i>The Department has determined that the herein approved activities meet the requirements of the (FHACA) rules. This approval does not obviate the local Floodplain Administrator's responsibility to ensure all development occurring within their community's Special Flood Hazard Area is compliant with the local Flood Damage Prevention Ordinance, and minimum NFIP standards, regardless of any state-issued permits. FEMA requires communities to review and permit all proposed construction or other development within their SFHA in order to participate in the NFIP.</i></p>		
<p><b>Prepared by:</b> Sheldon Piggot</p>	<p><b>Received and/or Recorded by County Clerk:</b></p>	
<p>If the permittee undertakes any regulated activity, project, or development authorized under this permit, such action shall constitute the permittee's acceptance of the permit in its entirety as well as the permittee's agreement to abide by the requirements of the permit and all conditions therein.</p>		
<p align="center"><b>This permit is not valid unless authorizing signature appears on the last page.</b></p>		

**STATEMENT OF AUTHORIZED IMPACTS:**

The authorized activities allow for the permittee to undertake impacts to regulated areas as described below. Additional impacts to regulated areas without prior Department approval shall constitute a violation of the rules under which this document is issued and may subject the permittee and/or property owner to enforcement action, pursuant to N.J.A.C. 7:13-2.18; N.J.A.C. 7:7A-22.

<b>FWW GP2 Underground Utility Lines</b>	<b>Permanent Disturbance (Acres)</b>	<b>Temporary Disturbance (Acres)</b>

	<b>11.2(f)</b>
Permanent Disturbed	0.047
Temporary Disturbed	0.133

**PRE-CONSTRUCTION CONDITIONS:**

1. **Timing:** If this permit contains a condition that must be satisfied prior to the commencement of construction, the permittee shall comply with such condition(s) within the time required by the permit or, if no time specific requirement is imposed, then the permittee shall comply with such condition(s) within six months of the effective date of the permit, or provide evidence satisfactory to the Division that such condition(s) cannot be satisfied.
2. Prior to the commencement of site clearing, grading, or construction onsite, the permittee shall install a sediment barrier at the limits of disturbance authorized herein, which is sufficient to prevent the sedimentation of the remaining freshwater wetlands and transition areas and shall serve as a physical barrier protecting these areas from encroachment by construction vehicles or other soil-disturbing activities. All sediment barriers and soil erosion control measures shall be kept in place and maintained throughout the duration of construction, until such time that the site is stabilized.

### FRESHWATER WETLANDS SPECIAL CONDITIONS:

1. The authorized activities shall comply with the applicable conditions set forth under N.J.A.C. 7:7-5.7, 7.2, 7.10A, and 20.2. Failure to comply with these conditions shall constitute a violation of the Freshwater Wetlands Protection Act (N.J.S.A. 13:9B-1 *et seq.*). Any additional un-permitted disturbance of freshwater wetlands, State open waters, or transition areas besides that shown on the approved plans shall be considered a violation of the Freshwater Wetlands Protection Act Rules unless the activity is exempt or a permit is obtained from the Department prior to the start of the disturbance.
2. The proposed project will permanently disturb 0.001 acres (51 s.f.) and temporarily disturb 0.084 acres (3,678 s.f.) of freshwater wetland transition area for the installation of fiber optic lines under a Freshwater Wetlands General Permit No. 2; and will permanently disturb 0.02 acres (865 s.f.) and temporarily disturb 0.049 acres (2,122 s.f.) of freshwater wetlands transition area for the milling, paving, and installation of guardrails associated with roadway improvements under a Freshwater Wetland General Permit No. 10A. Any additional un-permitted disturbance of freshwater wetlands, State open waters and/or transition areas besides that shown on the approved plans shall be considered a violation of the Freshwater Wetlands Protection Act Rules unless the activity is exempt or a permit is obtained from the Department prior to the start of the proposed disturbance.
3. To protect habitat for Wood Turtles (State-listed, threatened species) the permittee shall adhere to the following:
  - a. To prevent adverse impacts to hibernating turtles (i.e. in-stream work including stream bank excavation):
    - i. No site preparation, disturbance, grading, clearing or construction activity is permitted within the banks of the referenced watercourse between November 1 and April 1 of each calendar year.
    - ii. If a coffer dam or similar structure is proposed to *completely* enclose the work area, work may occur during this restricted period provided the coffer dam installation is completed prior to November 1 and thereafter completely precludes turtles from accessing the work area to rest or hibernate. This must include appropriate bank-side fencing to preclude terrestrial access to the coffer dam work area. Immediately after installation of the work area enclosure, a qualified herpetologist must thoroughly inspect the enclosed area for wood turtles. Please note the qualified herpetologist is required to obtain a scientific collecting permit from NJDEP, Division of Fish and Wildlife, Endangered and Nongame Species Program (ENSP) ([http://www.state.nj.us/dep/fgw/exotic\\_apps.htm](http://www.state.nj.us/dep/fgw/exotic_apps.htm)). Any wood turtles found must be reported to the NJDEP, Division of Fish and Wildlife, Endangered and Nongame Species Program (<http://www.state.nj.us/dep/fgw/ensp/rprtform.htm>), and carefully relocated outside of the proposed work area. Once this inspection is complete, authorized activities may commence within the coffer dammed work area.

- b. To prevent adverse impacts to resting, breeding or foraging habitats for wood turtles within the regulated areas associated with the referenced watercourses no authorized activities may commence from April 1 through May 30 and September 1 through November 15 of the calendar year *unless* the following measures have been taken:
    - i. Prior to the commencement of site preparation, disturbance, grading, clearing or construction activity the permittee shall erect a silt/debris fence around the footprint of *all* proposed activities (temporary and permanent) sufficient to exclude small wildlife species, and specifically wood turtle, from entering the proposed construction area.
    - ii. Immediately thereafter, a qualified herpetologist must thoroughly inspect the fenced-in work area for wood turtles. Please note the qualified herpetologist is required to obtain a scientific collecting permit from NJDEP, Division of Fish and Wildlife, Endangered and Nongame Species Program (ENSP) ([http://www.state.nj.us/dep/fgw/exotic\\_apps.htm](http://www.state.nj.us/dep/fgw/exotic_apps.htm)). Any wood turtles found must be reported to the NJDEP, Division of Fish and Wildlife, Endangered and Nongame Species Program (<http://www.state.nj.us/dep/fgw/ensp/rprtform.htm>), and relocated outside of the proposed work area. Once this inspection is complete, authorized activities may commence within the fenced work area.
    - iii. The fence must be monitored weekly and maintained until project completion.
  - c. The Department reserves the right to suspend all regulated activities onsite should it be determined that the permittee has not taken proper precautions to ensure continuous compliance with this condition.
4. The permanently maintained clearing underneath the utility line shall be no wider than 10 feet, as shown on the approved plans.
  5. The trench into which the utility line is placed shall be no wider than necessary to comply with the United States Occupational Safety and Health Administration safety standards for excavations set forth at 29 CFR Par 1926, Subpart P.
  6. Any excavation within freshwater wetlands, transition areas, or State open waters shall be backfilled to preexisting elevations with the uppermost 18 inches backfilled with original topsoil material. The permittee shall ensure that the backfilling activities do not interfere with the natural hydraulic characteristics of the freshwater wetlands.
  7. Any pipes laid through freshwater wetlands, transition areas, or State open waters shall be properly sealed to prevent leaking or infiltration and designed to not form a path for groundwater to be discharged or drained from the freshwater wetland.
  8. The Department has determined that the freshwater wetlands affected by this permit authorization are of intermediate and exceptional resource values and the standard transition area or buffer required adjacent to these wetlands is 50 and 150 feet., respectively. Any additional regulated activities conducted within the standard transition area onsite shall require a separate transition area waiver from the Division. Regulated activities within a transition area are defined at N.J.A.C. 7:7A-2.3. Please refer to the Freshwater Wetlands Protection Act (N.J.S.A. 13:9B-1 *et seq.*) and implementing Rules (N.J.A.C. 7:7A) for additional information.

9. This authorization for a General Permit is valid for a term not to exceed five years from the date of this permit. If the permittee wishes to continue an activity covered by the permit after the expiration date of the permit, the permittee must apply for and obtain a permit extension or a new permit, prior to the permit's expiration. If the term of the authorization exceeds the expiration date of the general permit issued by rule, and the permit upon which the authorization is based is modified by rule to include more stringent standards or conditions, or is not reissued, the applicant must comply with the requirements of the new regulations by applying for a new General Permit authorization or an Individual permit.

#### **FLOOD HAZARD AREA SPECIAL CONDITIONS:**

1. The Department has determined that this project is eligible for the linear development waiver of the Stormwater Management rules at N.J.A.C. 7:8-5.2(e). Any future expansion or alteration of the approved stormwater management system, which would affect water quality, increase the rate or volume of stormwater leaving the site, affect the infiltration capacity on the site, or alter the approved low impact site design, shall be reviewed and approved by the Department prior to construction. This includes any proposed changes to the discharge characteristics of any basin, the construction of new inlets or pipes that tie into the storm sewer network and/or the replacement of existing inlets or pipes with structures of different capacity.
2. The Division has determined that the required riparian zone adjacent to the regulated waters affected by the project is 50 feet from the top of banks of Cedar Brook, Cranbury Brook, Millstone River Tributary (Tributary south of Millstone River), Bear Brook Tributary and 150 feet from the top of banks of Millstone River Tributary (Tributary north of Millstone River), Millstone River, Rocky Brook Tributary. This permit authorizes the permanent disturbance to 2,063 s.f. (0.049 acres) and the temporary disturbance to 5,770 s.f. (0.133 acres) of actively disturbed riparian zone for the installation of a utility line and the installation of a guardrail and repaving of an existing roadway. Only work located within the riparian zone identified on the approved plans is permitted. Any additional disturbance to the riparian zone shall be considered a violation of the Flood Hazard Area Control Act rules (FHACAR) unless a permit is obtained from the Division of Land Use Regulation prior to the start of the disturbance.
3. To protect habitat for Wood Turtles (State-listed, threatened) permittee shall adhere to the following:
  - a. To prevent adverse impacts to hibernating turtles (i.e. in-stream work including stream bank excavation):
    - i. No site preparation, disturbance, grading, clearing or construction activity is permitted within the banks of the referenced watercourse between November 1 and April 1 of each calendar year.

- ii. If a coffer dam or similar structure is proposed to *completely* enclose the work area, work may occur during this restricted period provided the coffer dam installation is *completed* prior to November 1 and thereafter completely precludes turtles from accessing the work area to rest or hibernate. This must include appropriate bank-side fencing to preclude terrestrial access to the coffer dam work area. Immediately after installation of the work area enclosure, a qualified herpetologist must thoroughly inspect the enclosed area for wood turtles. Please note the qualified herpetologist is required to obtain a scientific collecting permit from NJDEP, Division of Fish and Wildlife, Endangered and Nongame Species Program (ENSP) ([http://www.state.nj.us/dep/fgw/exotic\\_apps.htm](http://www.state.nj.us/dep/fgw/exotic_apps.htm)). Any wood turtles found must be reported to the NJDEP, Division of Fish and Wildlife, Endangered and Nongame Species Program (<http://www.state.nj.us/dep/fgw/ensp/rprtform.htm>), and carefully relocated outside of the proposed work area. Once this inspection is complete, authorized activities may commence within the coffer dammed work area.
  - b. To prevent adverse impacts to resting, breeding or foraging habitats for wood turtles within the regulated areas associated with the referenced watercourses no authorized activities may commence from April 1 through May 30 and September 1 through November 15 of the calendar year *unless* the following measures have been taken:
    - i. Prior to the commencement of site preparation, disturbance, grading, clearing or construction activity the permittee shall erect a silt/debris fence around the footprint of *all* proposed activities (temporary and permanent) sufficient to exclude small wildlife species, and specifically wood turtle, from entering the proposed construction area.
    - ii. Immediately thereafter, a qualified herpetologist must thoroughly inspect the fenced-in work area for wood turtles. Please note the qualified herpetologist is required to obtain a scientific collecting permit from NJDEP, Division of Fish and Wildlife, Endangered and Nongame Species Program (ENSP) ([http://www.state.nj.us/dep/fgw/exotic\\_apps.htm](http://www.state.nj.us/dep/fgw/exotic_apps.htm)). Any wood turtles found must be reported to the NJDEP, Division of Fish and Wildlife, Endangered and Nongame Species Program (<http://www.state.nj.us/dep/fgw/ensp/rprtform.htm>), and relocated outside of the proposed work area. Once this inspection is complete, authorized activities may commence within the fenced work area.
    - iii. The fence must be monitored weekly and maintained until project completion.
  - c. The Department reserves the right to suspend all regulated activities onsite should it be determined that the permittee has not taken proper precautions to ensure continuous compliance with this condition.
4. Construction equipment shall not be stored, staged or driven within any channel, freshwater wetland or transition area, unless expressly approved by this permit and/or described on the approved plans.
5. Any new, reconstructed, enlarged, or elevated structure within a flood hazard area shall be secured to resist flotation, collapse, and displacement due to hydrostatic and hydrodynamic forces from floodwaters.
6. The regulated activity shall not adversely affect low-flow aquatic passage in any regulated water.

7. The regulated activity shall not expose unset or raw cement to flowing water within any channel or regulated water during construction.
8. Although no work is proposed within any streams, special caution shall be taken to protect warm water fish species resources within all rivers within vicinity of the proposed project between **May 1 and July 31 of each year**. Furthermore, any proposed grading or construction activities which likely would introduce sediment into said watercourse or which could cause an increase in the natural level of turbidity is also prohibited anytime and especially during this period. The Department reserves the right to suspend all regulated activities on-site should it be determined that the applicant has not taken proper precautions to ensure continuous compliance with this condition.
9. Vegetation within 150 feet of the top of the bank of Millstone River, the Millstone River tributary north of Millstone River, and Rocky Brook tributary, or within 50 feet of the top of bank of Cedar Brook, Cranbury Brook, the Millstone River tributary south of Millstone River, and Bear Brook tributary shall only be disturbed in the areas specifically shown on the approved drawing/s. No other vegetation within these riparian zones onsite shall be disturbed for any reason. This condition applies to all channels onsite regardless of the contributory drainage area.
10. All riparian zone vegetation that is temporarily cleared, cut, and/or removed to conduct a regulated activity, access an area where regulated activities will be conducted, or otherwise accommodate a regulated activity shall be replanted immediately after completion of the regulated activity, unless prevented by seasonal weather, in which case the vegetation shall be replanted as soon as conditions permit. The vegetation to be replanted shall:
  - i. Consist of vegetation of equal or greater ecological function and value as the vegetation that was cleared, cut, or removed. For example, herbaceous vegetation may be replaced with the same type of vegetation or with trees, but the trees in forested areas must be replaced with trees of equal or greater density and ecological function and value;
  - ii. Consist of native, non-invasive vegetation, except in an actively disturbed area. In an actively disturbed area, the vegetation may be replaced with the same type of vegetation that was cleared, cut, or removed, or with another kind of vegetation typical of an actively disturbed area. For example, lawn grass may be replaced with garden plants or agricultural crops; and
  - iii. In cases where replanting would interfere with continued access to or maintenance of a structure that is required by Federal, State, or local law, the vegetation replanted shall meet the requirements to the extent feasible.
11. If you begin any activity approved by this permit, you thereby accept this document in its entirety, and agree to adhere to all terms and conditions. If you do not accept or agree with this document in its entirety, do not begin construction. You are entitled to request an appeal within a limited time as detailed on the attached administrative hearing request checklist and tracking form.

#### **STANDARD CONDITIONS:**

1. The issuance of a permit shall in no way expose the State of New Jersey or the Department to liability for the sufficiency or correctness of the design of any construction or structure(s). Neither the State nor the Department shall, in any way, be liable for any loss of life or property that may occur by virtue of the activity or project conducted as authorized under a permit.

2. The issuance of a permit does not convey any property rights or any exclusive privilege.
3. The permittee shall obtain all applicable Federal, State, and local approvals prior to commencement of regulated activities authorized under a permit.
4. A permittee conducting an activity involving soil disturbance, the creation of drainage structures, or changes in natural contours shall obtain any required approvals from the Soil Conservation District or designee having jurisdiction over the site.
5. The permittee shall take all reasonable steps to prevent, minimize, or correct any adverse impact on the environment resulting from activities conducted pursuant to the permit, or from noncompliance with the permit.
6. The permittee shall immediately inform the Department of any unanticipated adverse effects on the environment not described in the application or in the conditions of the permit. The Department may, upon discovery of such unanticipated adverse effects, and upon the failure of the permittee to submit a report thereon, notify the permittee of its intent to suspend the permit.
7. The permittee shall immediately inform the Department by telephone at (877) 927-6337 (WARN DEP hotline) of any noncompliance that may endanger public health, safety, and welfare, or the environment. The permittee shall inform the Watershed & Land Management by telephone at (609) 777-0454 of any other noncompliance within two working days of the time the permittee becomes aware of the noncompliance, and in writing within five working days of the time the permittee becomes aware of the noncompliance. Such notice shall not, however, serve as a defense to enforcement action if the project is found to be in violation of this chapter. The written notice shall include:
  - i. A description of the noncompliance and its cause;
  - ii. The period of noncompliance, including exact dates and times;
  - iii. If the noncompliance has not been corrected, the anticipated length of time it is expected to continue; and
  - iv. The steps taken or planned to reduce, eliminate, and prevent recurrence of the noncompliance.
8. Any noncompliance with a permit constitutes a violation of this chapter and is grounds for enforcement action, as well as, in the appropriate case, suspension and/or termination of the permit.
9. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the authorized activity in order to maintain compliance with the conditions of the permit.
10. The permittee shall employ appropriate measures to minimize noise where necessary during construction, as specified in N.J.S.A. 13:1G-1 et seq. and N.J.A.C. 7:29.

11. The issuance of a permit does not relinquish the State's tidelands ownership or claim to any portion of the subject property or adjacent properties.
12. The issuance of a permit does not relinquish public rights to access and use tidal waterways and their shores.
13. The permittee shall allow an authorized representative of the Department, upon the presentation of credentials, to:
  - i. Enter upon the permittee's premises where a regulated activity, project, or development is located or conducted, or where records must be kept under the conditions of the permit;
  - ii. Have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit;
  - iii. Inspect, at reasonable times, any facilities, equipment, practices, or operations regulated or required under the permit. Failure to allow reasonable access under this paragraph shall be considered a violation of this chapter and subject the permittee to enforcement action; and
  - iv. Sample or monitor at reasonable times, for the purposes of assuring compliance or as otherwise authorized by the Federal Act, by the Freshwater Wetlands Protection Act, or by any rule or order issued pursuant thereto, any substances or parameters at any location.
14. The permittee shall not cause or allow any unreasonable interference with the free flow of a regulated water by placing or dumping any materials, equipment, debris or structures within or adjacent to the channel while the regulated activity, project, or development is being undertaken. Upon completion of the regulated activity, project, or development, the permittee shall remove and dispose of in a lawful manner all excess materials, debris, equipment, and silt fences and other temporary soil erosion and sediment control devices from all regulated areas.
15. The permittee and its contractors and subcontractors shall comply with all conditions, site plans, and supporting documents approved by the permit.
16. All conditions, site plans, and supporting documents approved by a permit shall remain in full force and effect, so long as the regulated activity, project, or development, or any portion thereof, is in existence, unless the permit is modified pursuant to the rules governing the herein approved permits.
17. The permittee shall perform any mitigation required under the permit in accordance with the rules governing the herein approved permits.
18. If any condition or permit is determined to be legally unenforceable, modifications and additional conditions may be imposed by the Department as necessary to protect public health, safety, and welfare, or the environment.
19. Any permit condition that does not establish a specific timeframe within which the condition must be satisfied (for example, prior to commencement of construction) shall be satisfied within six months of the effective date of the permit.

20. A copy of the permit and all approved site plans and supporting documents shall be maintained at the site at all times and made available to Department representatives or their designated agents immediately upon request.
21. The permittee shall provide monitoring results to the Department at the intervals specified in the permit.
22. A permit shall be transferred to another person only in accordance with the rules governing the herein approved permits.
23. A permit can be modified, suspended, or terminated by the Department for cause.
24. The submittal of a request to modify a permit by the permittee, or a notification of planned changes or anticipated noncompliance, does not stay any condition of a permit.
25. Where the permittee becomes aware that it failed to submit any relevant facts in an application, or submitted incorrect information in an application or in any report to the Department, it shall promptly submit such facts or information.
26. The permittee shall submit written notification to the Bureau of Coastal and Land Use Compliance and Enforcement, 401 East State Street, 4th Floor, PO Box 420, Mail Code 401-04C, Trenton, NJ 08625, at least three working days prior to the commencement of regulated activities.
27. The permittee shall record the permit, including all conditions listed therein, with the Office of the County Clerk (the Registrar of Deeds and Mortgages, if applicable) of each county in which the site is located. The permit shall be recorded within 30 calendar days of receipt by the permittee, unless the permit authorizes activities within two or more counties, in which case the permit shall be recorded within 90 calendar days of receipt. Upon completion of all recording, a copy of the recorded permit shall be forwarded to Watershed & Land Management at the address listed on page one of this permit.

**APPROVED PLAN(S):**

The drawing(s) hereby approved consist of 29 sheets, prepared by Cynthia J. Coupe, P.E. of Michael Baker International, Inc., dated April 2022, unrevised unless otherwise mentioned, and entitled:

“NEW JERSEY DEPARTMENT OF TRANSPORTATION, NJDEP FRESHWATER WETLAND PERMIT PLANS, ROUTE 130 WESTFIELD AVE. TO MAIN STREET, CONTRACT NO. 1412061, TOWNSHIP OF SOUTH BRUNSWICK, TOWNSHIP OF CRANBURY, MIDDLESEX COUNTY”, SHEETS NO. 5-19 of 24

“NEW JERSEY DEPARTMENT OF TRANSPORTATION, DRAINAGE DETAILS, ROUTE 130 WESTFIELD AVE. TO MAIN STREET, CONTRACT NO. 1412061, TOWNSHIP OF SOUTH BRUNSWICK, TOWNSHIP OF CRANBURY, MIDDLESEX COUNTY”, SHEETS NO. 21 of 21, undated and last revised September 1, 2022.

### APPEAL OF DECISION:

Any person who is aggrieved by this decision may submit an adjudicatory hearing request within 30 calendar days after public notice of the decision is published in the DEP Bulletin (available at [www.nj.gov/dep/bulletin](http://www.nj.gov/dep/bulletin)). If a person submits the hearing request after this time, the Department shall deny the request. The hearing request must include a completed copy of the Administrative Hearing Request Checklist (available at [www.nj.gov/dep/landuse/forms.html](http://www.nj.gov/dep/landuse/forms.html)). A person requesting an adjudicatory hearing shall submit the original hearing request to: NJDEP Office of Legal Affairs, Attention: Adjudicatory Hearing Requests, Mail Code 401-04L, P.O. Box 402, 401 East State Street, 7th Floor, Trenton, NJ 08625-0402. Additionally, a copy of the hearing request shall be submitted to the Director of Watershed & Land Management at the address listed on page one of this permit. In addition to your hearing request, you may file a request with the Office of Dispute Resolution to engage in alternative dispute resolution. Please see [www.nj.gov/dep/odr](http://www.nj.gov/dep/odr) for more information on this process.

If you need clarification on any section of this permit or conditions, please contact Watershed & Land Management's Technical Support Call Center at (609) 777-0454.
